the 1990s, the incidence of *S. flexneri* infections in the United Kingdom has increased, and the incidence of *S. flexneri* infection in the United States has increased in the 1980s and 1990s [10, 11]. In the United Kingdom, *S. flexneri* is the most common serotype of *S. flexneri* isolated from patients with shigellosis, followed by *S. flexneri* serotype 3 [12].

There is a paucity of data on the epidemiology of *S. flexneri* infection in the United Kingdom. In the United States, *S. flexneri* is the most common serotype of *S. flexneri* isolated from patients with shigellosis, followed by *S. flexneri* serotype 3 [13]. In the United Kingdom, *S. flexneri* is the most common serotype of *S. flexneri* isolated from patients with shigellosis, followed by *S. flexneri* serotype 3 [12].

The purpose of this study was to determine the prevalence of *S. flexneri* infection in the United Kingdom. The study was conducted in the United Kingdom, and the results of the study are presented in this paper. The study was conducted in the United Kingdom, and the results of the study are presented in this paper. The study was conducted in the United Kingdom, and the results of the study are presented in this paper.

the 1990s, the number of people in the United States who are obese has increased by 100% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 22% in 1998 (Health Survey for England 2000). In the United States, the prevalence of obesity has increased from 15% in 1980 to 30% in 1998 (Flegal et al. 2002).

Obesity is a complex condition, with many causes and consequences. It is a leading cause of death and disability in the United States, and is associated with a number of other health problems, including heart disease, diabetes, and cancer. Obesity is also a major cause of social and economic problems, and is a leading cause of poverty in many countries. The World Health Organization (WHO) has declared obesity a global health crisis, and has called for a coordinated international response to the problem.

There are many factors that contribute to obesity, including genetics, diet, and lifestyle. In the United States, the prevalence of obesity has increased significantly in the past few decades, and this is largely due to changes in diet and lifestyle. The diet in the United States has become much more calorie-dense, and people are eating more food than they need. In addition, people are becoming more sedentary, and are not getting enough exercise.

Obesity is a complex condition, and there is no simple solution. However, there are many things that people can do to prevent or reduce their risk of becoming obese. These include eating a healthy diet, getting enough exercise, and avoiding sedentary activities. It is also important to be aware of the signs and symptoms of obesity, and to seek medical advice if you are concerned about your weight.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.1 billion.

There are a number of factors that have contributed to the increase in the number of people in the world who are under 15 years of age. One of the main factors is the increase in the number of people who are having children at a younger age. This is due to a number of factors, including the fact that people are having children at a younger age than in the past, and the fact that people are having more children than in the past.

Another factor is the increase in the number of people who are surviving into old age. This is due to a number of factors, including the fact that people are living longer than in the past, and the fact that people are having more children than in the past. This is due to a number of factors, including the fact that people are having children at a younger age than in the past, and the fact that people are having more children than in the past.

The increase in the number of people in the world who are under 15 years of age is a major challenge for the world. It is a challenge because it means that there are more people who need to be educated, and more people who need to be employed. It is a challenge because it means that there are more people who need to be supported by the state, and more people who need to be supported by the family.
