the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.4 billion (United Nations, 1999).

There are a number of reasons why the world population is ageing. One of the main reasons is that the number of people who are living longer is increasing. This is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the number of people who are dying from infectious diseases. Another reason is that the number of people who are having children is decreasing. This is due to a number of factors, including a decline in the number of people who are having children at a young age, and a decline in the number of people who are having children at all.

The ageing of the world population has a number of implications. One of the main implications is that it will lead to a decline in the number of people who are working. This is because the number of people who are working is declining, while the number of people who are retired is increasing. This will lead to a decline in the number of people who are contributing to the economy, and a decline in the number of people who are paying taxes.

Another implication is that it will lead to a decline in the number of people who are able to support themselves. This is because the number of people who are able to support themselves is declining, while the number of people who are unable to support themselves is increasing. This will lead to a decline in the number of people who are able to pay for their own care, and a decline in the number of people who are able to pay for the care of others.

The ageing of the world population is a major challenge for the world. It is a challenge that will require a number of solutions. One of the main solutions is to improve the quality of life for people who are aged. This can be done by improving medical care, better nutrition, and a decline in the number of people who are dying from infectious diseases. Another solution is to increase the number of people who are working. This can be done by encouraging people to work longer, and by increasing the number of people who are having children.

The ageing of the world population is a major challenge for the world. It is a challenge that will require a number of solutions. 100

the 1990s, the incidence of *S. flexneri* infections in the United Kingdom has increased, and the incidence of *S. flexneri* infection in the United States has increased in the 1980s and 1990s [10, 11].

There is a paucity of data on the incidence of *S. flexneri* infection in the United Kingdom. The only published data on the incidence of *S. flexneri* infection in the United Kingdom are from a study of 10 years of *S. flexneri* infection in the United Kingdom, which reported an incidence of 1.5 cases per 100 000 per year [12].

The purpose of this study was to determine the incidence of *S. flexneri* infection in the United Kingdom, and to determine the risk factors for *S. flexneri* infection. The study was conducted in the United Kingdom, and the results are presented in this paper.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998. The public sector has become a major employer in the UK, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999), and the number of people in the public sector has increased by 2.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to provide the best possible value for money. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures. The aim of these initiatives is to ensure that the public sector is able to provide the best possible value for money, and to ensure that the public sector is able to provide the best possible service to the public.

One of the key initiatives in the public sector is the introduction of competition. This has led to a number of public sector organisations being privatised, and to a number of public sector organisations being opened up to competition from the private sector. The aim of this initiative is to ensure that the public sector is able to provide the best possible value for money, and to ensure that the public sector is able to provide the best possible service to the public.

Another key initiative in the public sector is the restructuring of public sector organisations. This has led to a number of public sector organisations being merged, and to a number of public sector organisations being reorganised. The aim of this initiative is to ensure that the public sector is able to provide the best possible value for money, and to ensure that the public sector is able to provide the best possible service to the public.

A third key initiative in the public sector is the introduction of performance measures. This has led to a number of public sector organisations being required to set performance targets, and to a number of public sector organisations being required to report on their performance. The aim of this initiative is to ensure that the public sector is able to provide the best possible value for money, and to ensure that the public sector is able to provide the best possible service to the public.

These initiatives are all aimed at improving the efficiency of the public sector, and at ensuring that the public sector is able to provide the best possible value for money. They are all part of a broader strategy to improve the public sector, and to ensure that the public sector is able to provide the best possible service to the public.

The public sector is a complex and diverse organisation, and it is difficult to measure its performance. However, the initiatives described above are all aimed at improving the efficiency of the public sector, and at ensuring that the public sector is able to provide the best possible value for money. They are all part of a broader strategy to improve the public sector, and to ensure that the public sector is able to provide the best possible service to the public.

the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation, 2000). The prevalence of mental health problems has increased in the general population, and the incidence of mental health problems has increased in the prison population (Mental Health Foundation, 2000).

There is a growing awareness of the need to address the mental health needs of prisoners. The Mental Health Act 1983 (MHA) was amended in 1999 to include provisions for the treatment of mental health problems in the prison population. The MHA 1999 provides for the treatment of mental health problems in the prison population, and for the treatment of mental health problems in the prison population.

The MHA 1999 provides for the treatment of mental health problems in the prison population, and for the treatment of mental health problems in the prison population. The MHA 1999 provides for the treatment of mental health problems in the prison population, and for the treatment of mental health problems in the prison population.

The MHA 1999 provides for the treatment of mental health problems in the prison population, and for the treatment of mental health problems in the prison population.
