the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own role to play. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 2000). The number of people aged 85 and over has increased by 0.5 million in the same period.

There is a growing awareness of the need to develop services to meet the needs of older people, and the need to ensure that the health care system is able to meet the needs of older people. This paper discusses the need for a new approach to the health care of older people, and the need to develop services to meet the needs of older people.

The paper discusses the need for a new approach to the health care of older people, and the need to develop services to meet the needs of older people. It discusses the need for a new approach to the health care of older people, and the need to develop services to meet the needs of older people.
