[Illegible text block]

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. This increase is due to a combination of factors, including a decline in infant mortality rates, a rise in life expectancy, and a high birth rate in many developing countries.

The increase in the number of children in the world has led to a corresponding increase in the number of children in the United States. In 1990, there were 75 million children under 18 years of age in the United States. By 2000, this number had increased to 80 million.

The increase in the number of children in the United States has led to a corresponding increase in the number of children in the United Kingdom. In 1990, there were 10 million children under 18 years of age in the United Kingdom. By 2000, this number had increased to 11 million.

The increase in the number of children in the United Kingdom has led to a corresponding increase in the number of children in the United States. In 1990, there were 75 million children under 18 years of age in the United States. By 2000, this number had increased to 80 million.

the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype in children with acute bacterial dysentery [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. The only published study of *S. flexneri* in the United Kingdom was by Smith *et al.* [12], who reported the isolation of 10 strains of *S. flexneri* from patients with acute bacterial dysentery in 1980. The serotypes were *S. flexneri* 3, 4, 5, 6, 7, 10, 11, 12, 13 and 14.

There is also a paucity of data on the epidemiology of *S. flexneri* in the United States. The only published study of *S. flexneri* in the United States was by Tarr *et al.* [13], who reported the isolation of 10 strains of *S. flexneri* from patients with acute bacterial dysentery in 1980. The serotypes were *S. flexneri* 3, 4, 5, 6, 7, 10, 11, 12, 13 and 14.

The purpose of this study was to determine the prevalence of *S. flexneri* in patients with acute bacterial dysentery in the United Kingdom and the United States. The study was designed to determine the prevalence of *S. flexneri* in patients with acute bacterial dysentery in the United Kingdom and the United States.

The study was designed to determine the prevalence of *S. flexneri* in patients with acute bacterial dysentery in the United Kingdom and the United States.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been launched in the UK to address this need. The Department of Health has launched the 'Ageing Well' initiative, which aims to improve the lives of older people by providing them with the services and support they need. The Department of Health has also launched the 'Ageing Well' campaign, which aims to raise awareness of the needs of older people and to encourage people to support them.

The 'Ageing Well' initiative is a multi-agency effort involving the Department of Health, the Department of Social Security, the Department of the Environment, and the Department of Transport. The initiative aims to improve the lives of older people by providing them with the services and support they need, and by raising awareness of the needs of older people and encouraging people to support them.

The 'Ageing Well' campaign is a multi-media campaign that includes television, radio, and print advertising. The campaign aims to raise awareness of the needs of older people and to encourage people to support them. The campaign also includes a number of initiatives to support older people, such as the 'Ageing Well' website and the 'Ageing Well' helpline.

The 'Ageing Well' website is a multi-media website that provides information about the needs of older people and the services and support available to them. The website also includes a number of initiatives to support older people, such as the 'Ageing Well' helpline and the 'Ageing Well' campaign.

The 'Ageing Well' helpline is a multi-media helpline that provides information about the needs of older people and the services and support available to them. The helpline also includes a number of initiatives to support older people, such as the 'Ageing Well' website and the 'Ageing Well' campaign.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public sector budgets. This is due to a number of factors, including the increasing cost of health care, the increasing cost of education, and the increasing cost of social services.

Another reason for the need to improve the efficiency of the public sector is the increasing demand for public services. This is due to a number of factors, including the increasing population, the increasing demand for health care, and the increasing demand for education.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public sector contracts, or by allowing private companies to take over public sector organisations.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public sector organisations. This can be done by merging public sector organisations, or by transferring public sector functions to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance measures. These measures can be used to monitor the performance of public sector organisations, and to identify areas where improvement is needed.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that the public sector is able to deliver the services that are required by the public, and the need to ensure that the public sector is able to operate within its budget.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is a major part of the economy, and it is essential that it is able to deliver the services that are required by the public in a cost-effective manner.
