the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics, 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office for National Statistics, 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for the ageing population, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on the following principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in society; and (4) to ensure that older people are able to live in their own homes.

The strategy is based on the following principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in society; and (4) to ensure that older people are able to live in their own homes. The strategy is based on the following principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in society; and (4) to ensure that older people are able to live in their own homes.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1998, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has become an important provider of social services, such as health care, education, and social housing. These services are essential for the well-being of the population, and they are provided by the public sector.

Another reason why the public sector has become an important employer of women is that it has become an important provider of social security. The public sector provides social security benefits, such as unemployment benefits, sickness benefits, and pension benefits. These benefits are essential for the well-being of the population, and they are provided by the public sector.

A third reason why the public sector has become an important employer of women is that it has become an important provider of social services for women. The public sector provides social services, such as day care, after-school care, and elder care. These services are essential for the well-being of women, and they are provided by the public sector.

There are a number of reasons why the public sector has become an important employer of women. [Illegible text block]

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 in the USA (U.S. Census Bureau 2000). The number of people aged 65 and over in the UK is projected to increase by 2.5 million by 2020 (Office for National Statistics 2001).

There is a growing awareness of the need to address the health and social care needs of the ageing population. The World Health Organization (WHO) has identified the need to address the health and social care needs of the ageing population as a key priority for the 21st century (WHO 1999). The WHO has identified the need to address the health and social care needs of the ageing population as a key priority for the 21st century (WHO 1999).

[The text is illegible due to poor scan quality. It appears to be a single paragraph of text, possibly containing some technical or scientific information, but the characters are too faint and blurry to read.]

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 4.5 million (Office of National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been launched in the UK to address this need. The Department of Health has launched the 'Ageing Well' initiative, which aims to improve the lives of older people by providing them with the services and support they need to live independently and actively. The initiative includes a range of services, including home care, day care, and residential care.

The 'Ageing Well' initiative is a multi-agency effort, involving the Department of Health, the Department of Social Security, and local authorities. The initiative is based on the principle that older people should be able to live independently and actively, and that they should be able to access the services and support they need to do so. The initiative includes a range of services, including home care, day care, and residential care.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.0 billion.

There are a number of factors which have contributed to the increase in the number of people in the world who are under 15 years of age. These include a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

The decline in the death rate has been the most significant factor. This has been due to a number of factors, including a decline in the incidence of infectious diseases, a decline in the incidence of non-communicable diseases, and a decline in the incidence of violence.

The decline in the birth rate has also been a significant factor. This has been due to a number of factors, including a decline in the number of children born to women, a decline in the number of children born to men, and a decline in the number of children born to couples.

The decline in the rate of migration has also been a significant factor. This has been due to a number of factors, including a decline in the number of people who are migrating from one country to another, a decline in the number of people who are migrating from one region to another, and a decline in the number of people who are migrating from one social class to another.

The increase in the number of people in the world who are aged 65 and over has also been a significant factor. This has been due to a number of factors, including a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

The increase in the number of people in the world who are aged 15–64 years has also been a significant factor. This has been due to a number of factors, including a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

[REDACTED]

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is organized into several lines, with some lines appearing to have indentation or different formatting than others. The overall tone is formal and academic, given the context of the page number and the structured layout.]

[The text continues with several more lines of dense, illegible characters, maintaining the same formal and academic appearance. The lines are closely spaced, and the overall density of the text is high, consistent with a scanned document page.]

[The final line of text on the page is also dense and illegible, completing the block of text. The overall impression is that of a scanned document page with high text density and some noise/artifacts from the scanning process.]
