the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics, 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office for National Statistics, 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the health and quality of life of older people. The strategy is based on three main principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in the activities of their communities.

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 15.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following assumptions: (1) that older people are a diverse group with different needs and interests; (2) that older people should be able to live independently and actively; (3) that older people should have access to the services and support they need; and (4) that older people should be treated with respect and dignity. The strategy sets out a range of measures to be taken to improve the lives of older people, including: (1) to improve the quality of care and support for older people; (2) to improve the accessibility of services and support for older people; and (3) to improve the representation of older people in decision-making.

The strategy also sets out a range of measures to be taken to improve the lives of older people, including: (1) to improve the quality of care and support for older people; (2) to improve the accessibility of services and support for older people; and (3) to improve the representation of older people in decision-making. The strategy is based on the following assumptions: (1) that older people are a diverse group with different needs and interests; (2) that older people should be able to live independently and actively; (3) that older people should have access to the services and support they need; and (4) that older people should be treated with respect and dignity.

The strategy also sets out a range of measures to be taken to improve the lives of older people, including: (1) to improve the quality of care and support for older people; (2) to improve the accessibility of services and support for older people; and (3) to improve the representation of older people in decision-making. The strategy is based on the following assumptions: (1) that older people are a diverse group with different needs and interests; (2) that older people should be able to live independently and actively; (3) that older people should have access to the services and support they need; and (4) that older people should be treated with respect and dignity.
