the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The World Health Organization (WHO) has developed a 'Global Strategy on Ageing and Health' (WHO 1999) which aims to 'enable older people to live longer, healthier, and more active lives'. The WHO has also developed a 'Global Strategy on the Prevention of Falls in Older People' (WHO 2001) which aims to 'reduce the risk of falls and the consequences of falls in older people'.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on the following principles:

- Older people should be able to live independently and actively in their own homes.
- Older people should be able to access the services and support they need to live well.
- Older people should be able to participate in the decisions that affect their lives.

The strategy also sets out a number of key objectives for the government, including: to improve the health and well-being of older people; to increase the number of older people who are able to live independently; to improve the quality of care and support for older people; and to increase the participation of older people in the decisions that affect their lives.
