the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported to be the most common serotype of *Shigella* isolated from children with shigellosis [11]. In the United Kingdom, *S. flexneri* serotype 3 is the most common serotype isolated from children with shigellosis [12].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1980s, *S. flexneri* was the most common serotype of *Shigella* isolated from children with shigellosis in the United Kingdom [13]. In the 1990s, *S. flexneri* was the most common serotype of *Shigella* isolated from children with shigellosis in the United Kingdom [14].

The purpose of this study was to determine the prevalence of *S. flexneri* in children with shigellosis in the United Kingdom. The study was conducted in the United Kingdom, where *S. flexneri* is the most common serotype of *Shigella* isolated from children with shigellosis [12].

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which suggests that the two fields are closely related.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 1.5 million women employed in the public sector in 1995, compared with 1.2 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1995, 75% of the public sector workforce were women, compared with 65% in 1980.

Another reason is that the public sector has a high proportion of women in its senior management. In 1995, 35% of the public sector senior management were women, compared with 25% in 1980.

A third reason is that the public sector has a high proportion of women in its part-time workforce. In 1995, 45% of the public sector part-time workforce were women, compared with 35% in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1995, 75% of the public sector workforce were women, compared with 65% in 1980.

[The following text is redacted and represented by a large black box.]

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1999, compared with 1.2 million in 1980.

There are a number of reasons why the public sector has become an important employer of people with disabilities. One reason is that the public sector has a long history of employing people with disabilities. In the 19th century, the public sector employed people with disabilities in a number of different roles, including as clerks, typists, and stenographers.

Another reason why the public sector has become an important employer of people with disabilities is that the public sector has a number of different departments and agencies, each of which has its own specific needs. This means that the public sector can employ people with disabilities in a wide range of roles, from clerical to professional.

One of the main reasons why the public sector has become an important employer of people with disabilities is that the public sector has a number of different departments and agencies, each of which has its own specific needs.
