[REDACTED]

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.0 billion.

There are a number of factors that have contributed to the increase in the number of people in the world who are under 15 years of age. One of the main factors is the increase in the number of people who are surviving into old age. This is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the number of people who are dying from infectious diseases.

Another factor is the increase in the number of people who are having children. This is due to a number of factors, including a decline in the number of people who are dying from infectious diseases, a decline in the number of people who are having abortions, and a decline in the number of people who are using contraception.

The increase in the number of people in the world who are under 15 years of age has a number of implications. One of the main implications is that it will increase the demand for resources, such as food, water, and shelter. This will put pressure on the environment and on the world's resources.

Another implication is that it will increase the demand for education. This will put pressure on the world's education system and on the world's resources. It will also increase the demand for health care, which will put pressure on the world's health care system and on the world's resources.

The increase in the number of people in the world who are under 15 years of age is a major challenge for the world. It is a challenge that will require the world to work together to find solutions. The world must find ways to meet the needs of the growing population, while also protecting the environment and the world's resources.

The world must find ways to ensure that everyone has access to food, water, and shelter. The world must also find ways to ensure that everyone has access to education and health care. The world must find ways to ensure that everyone has a chance to live a decent life.

The world must find ways to ensure that everyone has a chance to live a decent life. The world must find ways to ensure that everyone has access to food, water, and shelter. The world must also find ways to ensure that everyone has access to education and health care.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.2 billion.

There are a number of factors which have contributed to the increase in the number of people in the world who are under 15 years of age. These factors include a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

The decline in the death rate has been the most significant factor in the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including improvements in medical care, a decline in the incidence of infectious diseases, and a decline in the incidence of violence.

The decline in the birth rate has also contributed to the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including a decline in the number of children per woman, a decline in the number of women who are married, and a decline in the number of women who are employed.

The decline in the rate of migration has also contributed to the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including a decline in the number of people who are emigrating, a decline in the number of people who are immigrating, and a decline in the number of people who are naturalized citizens.

The increase in the number of people in the world who are under 15 years of age has a number of implications. One implication is that there will be a need for more schools and teachers. Another implication is that there will be a need for more health care services. A third implication is that there will be a need for more social services.

The increase in the number of people in the world who are under 15 years of age is a challenge for the world. It is a challenge that requires the attention of governments, the private sector, and civil society. It is a challenge that requires the development of new policies and programs. It is a challenge that requires the commitment of all of us.

The increase in the number of people in the world who are under 15 years of age is a challenge for the world. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998 (Department of Health 1999). The number of people employed in the health service has increased by 1.2 million, from 1.8 million in 1980 to 3 million in 1998 (Department of Health 1999).

There is a growing emphasis on the need to improve the quality of health care, and this has led to a number of initiatives to improve the quality of health care. The Department of Health has set up a number of committees to monitor and improve the quality of health care, and has introduced a number of measures to improve the quality of health care. The National Patient Safety Agency (NPSA) was set up in 1999 to monitor and improve the quality of health care, and has introduced a number of measures to improve the quality of health care.

The NPSA has introduced a number of measures to improve the quality of health care, including the introduction of a national patient safety framework, the introduction of a national patient safety audit, and the introduction of a national patient safety programme. The NPSA has also introduced a number of measures to improve the quality of health care, including the introduction of a national patient safety framework, the introduction of a national patient safety audit, and the introduction of a national patient safety programme.

The NPSA has also introduced a number of measures to improve the quality of health care, including the introduction of a national patient safety framework, the introduction of a national patient safety audit, and the introduction of a national patient safety programme. The NPSA has also introduced a number of measures to improve the quality of health care, including the introduction of a national patient safety framework, the introduction of a national patient safety audit, and the introduction of a national patient safety programme.

The NPSA has also introduced a number of measures to improve the quality of health care, including the introduction of a national patient safety framework, the introduction of a national patient safety audit, and the introduction of a national patient safety programme. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been developed to address this need. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 7.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following assumptions: (1) that older people are a diverse group with different needs and interests; (2) that older people should be able to live independently and actively; (3) that older people should have access to the services and support they need; and (4) that older people should be treated with respect and dignity. The strategy sets out a range of measures to be taken to improve the lives of older people, including: (1) to improve the physical environment; (2) to improve the social environment; (3) to improve the financial environment; and (4) to improve the health and social care environment.

The strategy is based on the following principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.
