the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1999, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1999, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are part-time or flexible. In 1999, 22% of the public sector workforce were employed on part-time or flexible contracts, compared with 12% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

A third reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are well paid. In 1999, the average salary of a public sector employee was £20,000, compared with £15,000 in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social security and the management of public infrastructure.

The public sector is a major source of employment in the UK, and it is also a major source of revenue for the state. The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office of National Statistics 2000). The number of people aged 85 and over has increased by 0.5 million in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people are able to live independently for as long as possible; (2) to ensure that older people are able to participate in the life of the community; and (3) to ensure that older people are able to live in the place of their choice.

The strategy is based on the following assumptions: (1) that older people are a valuable resource; (2) that older people are able to live independently for as long as possible; (3) that older people are able to participate in the life of the community; and (4) that older people are able to live in the place of their choice. The strategy is based on the following assumptions: (1) that older people are a valuable resource; (2) that older people are able to live independently for as long as possible; (3) that older people are able to participate in the life of the community; and (4) that older people are able to live in the place of their choice.

The strategy is based on the following assumptions: (1) that older people are a valuable resource; (2) that older people are able to live independently for as long as possible; (3) that older people are able to participate in the life of the community; and (4) that older people are able to live in the place of their choice. The strategy is based on the following assumptions: (1) that older people are a valuable resource; (2) that older people are able to live independently for as long as possible; (3) that older people are able to participate in the life of the community; and (4) that older people are able to live in the place of their choice.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; (4) to ensure that older people are able to participate in decisions about their care; and (5) to ensure that older people are able to live in their own homes for as long as possible.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

The Department of Health (2000) has also set out a number of key challenges for the NHS to meet the needs of older people. These challenges are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

The Department of Health (2000) has also set out a number of key opportunities for the NHS to meet the needs of older people. These opportunities are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

The Department of Health (2000) has also set out a number of key priorities for the NHS to meet the needs of older people. These priorities are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

The Department of Health (2000) has also set out a number of key messages for the NHS to meet the needs of older people. These messages are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

The Department of Health (2000) has also set out a number of key conclusions for the NHS to meet the needs of older people. These conclusions are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

The Department of Health (2000) has also set out a number of key recommendations for the NHS to meet the needs of older people. These recommendations are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the quality of care for older people; (2) to reduce the costs of care for older people; (3) to increase the number of people who are able to live in their own homes; (4) to increase the number of people who are able to participate in decisions about their care; and (5) to increase the number of people who are able to live independently.

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to the quality of the scan and the density of the text. The text appears to be a single paragraph or a series of closely related sentences. The visible fragments of text are as follows:]

the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype in children with acute bacterial dysentery [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1970s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [12]. In the 1980s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [13]. In the 1990s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [14].

The purpose of this study was to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 2000). The number of people aged 85 and over has increased by 0.5 million.

There is a growing awareness of the need to address the needs of older people in the community. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people and to ensure that they are able to live independently and actively in the community.

The strategy is based on the following principles: (1) older people should be able to live independently and actively in the community; (2) older people should be able to participate in the life of the community; (3) older people should be able to live in their own homes; (4) older people should be able to access the services and facilities they need; (5) older people should be able to live in a safe and secure environment.

The strategy is based on the following principles: (1) older people should be able to live independently and actively in the community; (2) older people should be able to participate in the life of the community; (3) older people should be able to live in their own homes; (4) older people should be able to access the services and facilities they need; (5) older people should be able to live in a safe and secure environment.

The strategy is based on the following principles: (1) older people should be able to live independently and actively in the community; (2) older people should be able to participate in the life of the community; (3) older people should be able to live in their own homes; (4) older people should be able to access the services and facilities they need; (5) older people should be able to live in a safe and secure environment.
