the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.0 billion.

There are a number of factors that have contributed to the increase in the number of people in the world who are under 15 years of age. One of the main factors is the increase in the number of people who are surviving infancy. In the 1950s, only about 50% of children survived to the age of 5 years. Today, over 90% of children survive to the age of 5 years.

Another factor is the increase in the number of people who are surviving to the age of 15 years. In the 1950s, only about 20% of people survived to the age of 15 years. Today, over 80% of people survive to the age of 15 years.

The increase in the number of people in the world who are under 15 years of age is a result of a combination of factors. The most important factors are the increase in the number of people who are surviving infancy and the increase in the number of people who are surviving to the age of 15 years.

The increase in the number of people in the world who are under 15 years of age is a result of a combination of factors. The most important factors are the increase in the number of people who are surviving infancy and the increase in the number of people who are surviving to the age of 15 years.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop services that meet the needs of older people, and the need to ensure that the health care system is able to meet the needs of older people. The Department of Health (1999) has identified the need to develop services that meet the needs of older people, and the need to ensure that the health care system is able to meet the needs of older people.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for the ageing population, which sets out the government's commitment to improve the health and well-being of older people. The strategy is based on three main principles: (1) to improve the health and well-being of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.

The strategy is based on three main principles: (1) to improve the health and well-being of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.
