the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which is not surprising given that they are both part of the same journal.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 7.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key measures for the NHS to meet the needs of older people. These measures are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key priorities for the NHS to meet the needs of older people. These priorities are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'communication' field is defined as:

...the study of the processes of communication production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'information science' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'information studies' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'information technology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'information systems' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'information management' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'information policy' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'information law' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

The 'information ethics' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 11)

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

The first part of the paper discusses the importance of the research and the objectives of the study. It then moves on to a literature review, which provides a background on the topic and identifies the gaps in the existing research. The methodology section describes the research design, data collection, and analysis. The results section presents the findings of the study, and the conclusion summarizes the main points and offers suggestions for future research.

The research was conducted in a systematic and rigorous manner, following the principles of good research practice. The data was collected from a representative sample of the population, and the analysis was carried out using appropriate statistical methods. The results of the study are presented in a clear and concise manner, and the conclusions are based on the evidence gathered.

The study has several strengths, including a well-defined research design, a large and diverse sample, and the use of advanced statistical techniques. However, there are also some limitations, such as the cross-sectional nature of the data and the potential for self-report bias. Despite these limitations, the study provides valuable insights into the topic and contributes to the existing knowledge in the field.

In conclusion, the research has shown that there is a significant relationship between the variables studied. The findings have important implications for practice and policy, and further research is needed to explore the underlying mechanisms and to test the generalizability of the results.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1995, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has become an important provider of social services, such as health care, education, and social housing. Another reason is that the public sector has become an important provider of social insurance, such as unemployment benefits and pension schemes. A third reason is that the public sector has become an important provider of social capital, such as community centres and voluntary organisations.

The public sector has also become an important employer of women because it provides a number of benefits that are attractive to women. For example, the public sector provides a number of benefits that are not available in the private sector, such as paid maternity leave, paid sick leave, and paid parental leave. The public sector also provides a number of benefits that are not available in the private sector, such as pension schemes and health insurance.

There are a number of reasons why the public sector has become an important employer of women.
