the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 2000). The number of people aged 85 and over has increased by 0.5 million in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: to promote independence, to support families and carers, and to improve the quality of life of older people.

The strategy also sets out a number of key objectives, including: to reduce the number of people who are dependent on others; to increase the number of people who are able to live independently; to improve the quality of life of older people; and to ensure that older people are able to participate fully in society.

The strategy is a key document for the development of services for older people. It provides a framework for the development of services, and sets out the government's commitment to improve the lives of older people. The strategy is a key document for the development of services for older people.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following assumptions: (1) that older people are a diverse group with different needs and interests; (2) that older people have the right to live independently and actively; (3) that older people have the right to access the services and support they need; and (4) that older people should be treated with respect and dignity. The strategy sets out a range of measures to be taken to improve the lives of older people, including: (1) to improve the physical environment; (2) to improve the social environment; (3) to improve the financial environment; and (4) to improve the health and social care environment.

The strategy also sets out a range of measures to be taken to improve the lives of older people, including: (1) to improve the physical environment; (2) to improve the social environment; (3) to improve the financial environment; and (4) to improve the health and social care environment. The strategy is based on the following assumptions: (1) that older people are a diverse group with different needs and interests; (2) that older people have the right to live independently and actively; (3) that older people have the right to access the services and support they need; and (4) that older people should be treated with respect and dignity.

The strategy also sets out a range of measures to be taken to improve the lives of older people, including: (1) to improve the physical environment; (2) to improve the social environment; (3) to improve the financial environment; and (4) to improve the health and social care environment. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the world population is increasing so rapidly. One of the main reasons is that the number of people who are surviving to old age is increasing. This is due to a number of factors, including improved medical care, better nutrition, and a decline in the number of people who are dying from infectious diseases.

Another reason why the world population is increasing so rapidly is that the number of people who are having children is increasing. This is due to a number of factors, including a decline in the number of people who are dying from infectious diseases, a decline in the number of people who are having abortions, and a decline in the number of people who are using contraception.

There are a number of other factors that are contributing to the rapid increase in the world population. These include a decline in the number of people who are dying from infectious diseases, a decline in the number of people who are having abortions, and a decline in the number of people who are using contraception.

The rapid increase in the world population is a major concern for many people. This is because a larger population means a greater demand for resources, such as food, water, and energy. It also means a greater demand for housing and infrastructure. This could lead to a number of problems, including a decline in the quality of life and a decline in the environment.

There are a number of ways in which the world population could be reduced. One way is to increase the number of people who are using contraception. Another way is to increase the number of people who are having abortions. A third way is to increase the number of people who are dying from infectious diseases.

There are a number of other ways in which the world population could be reduced. These include a decline in the number of people who are having children, a decline in the number of people who are surviving to old age, and a decline in the number of people who are using contraception.
