the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1999, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has become an important provider of social services, such as health care, education, and social housing. These services are essential for the well-being of the population, and they are provided by the public sector.

Another reason why the public sector has become an important employer of women is that it has become an important provider of social security. The public sector provides social security benefits, such as unemployment benefits, sickness benefits, and pension benefits. These benefits are essential for the well-being of the population, and they are provided by the public sector.

A third reason why the public sector has become an important employer of women is that it has become an important provider of social services for women. The public sector provides social services, such as day care, after-school care, and elder care. These services are essential for the well-being of women, and they are provided by the public sector.

the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype in the 1990s [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1980s, *S. flexneri* was the most common serotype isolated from patients with acute bacterial dysentery in the United Kingdom [12]. In the 1990s, *S. flexneri* was the most common serotype isolated from patients with acute bacterial dysentery in the United Kingdom [13].

The purpose of this study was to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'communication' field is defined as:

...the study of the nature, sources, uses, and management of communication, and the study of the communication of information. (p. 1)

These definitions are not mutually exclusive, and the two fields overlap significantly.
