the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 1999). The number of people aged 85 and over has increased by 0.5 million in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently; (2) to ensure that older people have access to the services they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following assumptions: (1) that older people are a valuable part of our society; (2) that older people have the right to live independently; (3) that older people have the right to access the services they need; and (4) that older people should be treated with respect and dignity. The strategy is based on the following principles: (1) to ensure that older people have the opportunity to live independently; (2) to ensure that older people have access to the services they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following principles: (1) to ensure that older people have the opportunity to live independently; (2) to ensure that older people have access to the services they need; and (3) to ensure that older people are treated with respect and dignity. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 85 and over has increased by 0.5 million in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has set out a strategy for the future of health care for older people. The strategy is based on the principle that older people should be able to live in their own homes for as long as possible, and that health care should be provided in a way that is appropriate to their needs. The strategy is based on the following principles:

- Older people should be able to live in their own homes for as long as possible.
- Health care should be provided in a way that is appropriate to the needs of older people.
- Older people should be able to access health care services when they need them.
- Older people should be able to participate in decisions about their health care.
- Older people should be able to access health care services in a way that is convenient for them.

The strategy is based on the principle that older people should be able to live in their own homes for as long as possible. This means that health care services should be developed in a way that allows older people to remain in their own homes for as long as possible. This may involve providing services such as home care, day care, and residential care.

Health care should be provided in a way that is appropriate to the needs of older people. This means that health care services should be developed in a way that takes into account the specific needs of older people. This may involve providing services such as geriatric medicine, geriatric psychiatry, and geriatric nursing.

Older people should be able to access health care services when they need them. This means that health care services should be developed in a way that allows older people to access services when they need them. This may involve providing services such as home care, day care, and residential care.

Older people should be able to participate in decisions about their health care. This means that health care services should be developed in a way that allows older people to participate in decisions about their health care. This may involve providing services such as geriatric medicine, geriatric psychiatry, and geriatric nursing.

Older people should be able to access health care services in a way that is convenient for them. This means that health care services should be developed in a way that allows older people to access services in a way that is convenient for them. This may involve providing services such as home care, day care, and residential care.

The strategy is based on the principle that older people should be able to live in their own homes for as long as possible. the 1990s, the number of people in the United States with a college degree has increased from 15% to 25% (U.S. Department of Education, 1997). The number of people with a high school diploma has increased from 85% to 90% (U.S. Department of Education, 1997).

There is a growing emphasis on the importance of education in the United States. The federal government has increased its funding for education from \$12 billion in 1980 to \$30 billion in 1995 (U.S. Department of Education, 1997). The state of California has increased its funding for education from \$1.5 billion in 1980 to \$4.5 billion in 1995 (California Department of Education, 1997).
