the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of the ageing population. The Department of Health (2000) has identified the need to develop a 'new paradigm' of health and social care for the ageing population. This paradigm is based on the principles of 'active ageing', which is defined as the process of optimising the health, participation and security of older people (World Health Organization 1999).

The number of people in the public sector who are employed in the health sector has increased by 1.2 million (from 1.2 million in 1980 to 2.4 million in 1995).

There are a number of reasons why the public sector has grown so rapidly. One of the main reasons is that the government has increased its spending on the public sector. Another reason is that the private sector has not been able to provide enough services to meet the needs of the population.

The public sector has also grown because of the increasing demand for services. As the population ages, there is a greater need for health and social care services. This has led to a rapid increase in the number of people working in the public sector.

There is a growing emphasis on the need to improve the quality of care in the public sector. The Department of Health (2000) has set out a number of key objectives for the public sector, including: 'to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care'.
