[REDACTED]

[The following text is a dense, continuous block of characters and symbols, likely representing a corrupted or heavily redacted document. It contains no legible words or phrases.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998. The public sector has become a major employer in the UK, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a key factor in the overall growth of the economy.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office of National Statistics 1999). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 6.5 million (Office of National Statistics 1999).

There is a growing awareness of the need to address the needs of older people in the community. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on the following principles:

- Older people should be able to live independently in their own homes for as long as possible.
- Older people should be able to access the services and support they need to live well.
- Older people should be able to participate in the decisions that affect their lives.
- Older people should be able to live in a safe and secure environment.

The strategy also sets out a number of key objectives, including: to improve the health and social care of older people; to improve the quality of life of older people; to improve the safety and security of older people; and to improve the participation of older people in the decisions that affect their lives.

The strategy is a key document for the development of services for older people in the UK. It provides a framework for the development of services and for the evaluation of the effectiveness of services. It also provides a basis for the development of policies and for the allocation of resources.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.4 billion (United Nations, 1999).

There are a number of reasons why the world population is ageing. First, the number of people who survive to old age has increased. In 1950, the life expectancy at birth was 47 years for men and 51 years for women. By 1995, life expectancy at birth had increased to 71 years for men and 76 years for women (United Nations, 1999). This increase in life expectancy is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Second, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations, 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Third, the number of people who are aged 15 and under has increased. In 1950, there were 1.1 billion people aged 15 and under in the world. By 1995, there were 1.5 billion people aged 15 and under in the world (United Nations, 1999). This increase in the number of people aged 15 and under is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

The world population is ageing, and this has a number of implications for the world. First, the number of people who are aged 65 and over is increasing, and this has a number of implications for the world. Second, the number of people who are aged 15 and under is increasing, and this has a number of implications for the world. Third, the number of people who are aged 15 and under is increasing, and this has a number of implications for the world.
