It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 15.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people. The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. the 1990s, the number of people in the United States who are obese has increased by 100% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1997 (Health Survey for England 1997). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002).

Obesity is a complex condition, with many causes and consequences. It is a leading cause of death and disability in the United States, and a major public health problem in many other countries. Obesity is associated with a number of health problems, including heart disease, diabetes, and certain types of cancer. It is also associated with social and psychological problems, such as discrimination and low self-esteem.

There are many factors that contribute to obesity, including genetics, diet, and physical activity. In the United States, the prevalence of obesity has increased significantly in the past few decades, and this is largely due to changes in diet and physical activity. In the United Kingdom, the prevalence of obesity has also increased, but at a slower rate than in the United States.

Obesity is a complex condition, and it is important to understand the many factors that contribute to it. In the United States, the prevalence of obesity has increased significantly in the past few decades, and this is largely due to changes in diet and physical activity. In the United Kingdom, the prevalence of obesity has also increased, but at a slower rate than in the United States.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a new paradigm of care for the ageing population, one that is based on the principles of autonomy, dignity, choice, and respect. The Department of Health (1999) has also identified the need to develop a new paradigm of care for the ageing population, one that is based on the principles of autonomy, dignity, choice, and respect.

The Department of Health (1999) has also identified the need to develop a new paradigm of care for the ageing population, one that is based on the principles of autonomy, dignity, choice, and respect.

The Department of Health (1999) has identified the need to develop a new paradigm of care for the ageing population, one that is based on the principles of autonomy, dignity, choice, and respect. The Department of Health (1999) has also identified the need to develop a new paradigm of care for the ageing population, one that is based on the principles of autonomy, dignity, choice, and respect.

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]
