the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following assumptions: (1) that older people are a diverse group with different needs and interests; (2) that older people should be able to live independently and actively; (3) that older people should have access to the services and support they need; and (4) that older people should be treated with respect and dignity. The strategy sets out a range of measures to be taken to improve the lives of older people, including: (1) to improve the physical environment; (2) to improve the social environment; (3) to improve the financial environment; and (4) to improve the health and social care environment.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which suggests that the two fields are closely related.

[REDACTED]

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations 1999).

There is a growing awareness of the need to address the needs of the young and the old in the context of the ageing of the population. The United Nations (1999) has identified the need to address the needs of the young and the old as a key challenge for the 21st century. The World Bank (1999) has identified the need to address the needs of the young and the old as a key challenge for the 21st century.

The World Bank (1999) has identified the need to address the needs of the young and the old as a key challenge for the 21st century. The World Bank (1999) has identified the need to address the needs of the young and the old as a key challenge for the 21st century.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) and the number of people in the private sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care and to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which aims to improve the quality of care and to ensure that the public sector is able to meet the needs of the population. The Act also aims to improve the efficiency of the public sector and to ensure that it is able to provide the best possible value for money.

The Health Care Act 1999 also aims to improve the quality of care and to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which aims to improve the quality of care and to ensure that the public sector is able to meet the needs of the population.

The Health Care Act 1999 also aims to improve the quality of care and to ensure that the public sector is able to meet the needs of the population.
