the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype in children with acute bacterial dysentery [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1980s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [12]. In the 1990s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [13]. In the 1990s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [13].

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations 1999).

There is a growing awareness of the need to address the needs of the young and the old in the context of the ageing of the population. The United Nations (1999) has identified the need to address the needs of the young and the old as a key challenge for the 21st century. The World Bank (1999) has identified the need to address the needs of the young and the old as a key challenge for the 21st century.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations 1999).

There are a number of reasons why the world population is ageing. First, the number of people who are under 15 years of age has decreased from 1.1 billion in 1990 to 0.9 billion in 2000. This is due to a decline in the birth rate, which has been caused by a number of factors, including a decline in the number of children born to women, a decline in the number of children born to women who are under 15 years of age, and a decline in the number of children born to women who are over 35 years of age.

Second, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Third, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Fourth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Fifth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Sixth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Seventh, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Eighth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on the following principles:

- Older people should be able to live independently and actively.
- Older people should be able to access the services and support they need.
- Older people should be able to participate in the decisions that affect their lives.
- Older people should be able to live in a safe and secure environment.
- Older people should be able to live in a community that respects their dignity and rights.

The strategy also sets out a number of key objectives, including:

- To improve the health and well-being of older people.
- To improve the social and economic participation of older people.
- To improve the living conditions of older people.
- To improve the protection of older people.

The strategy is a key document for the UK government, and it sets out the government's commitment to improve the lives of older people. It is a document that is of great importance to older people and their families, and it is a document that is of great importance to the UK government.

The strategy is a key document for the UK government, and it sets out the government's commitment to improve the lives of older people. It is a document that is of great importance to older people and their families, and it is a document that is of great importance to the UK government.
