the 1990s, the incidence of *S. flexneri* infections in the United Kingdom has increased, and the incidence of *S. flexneri* infection in the United States has increased in the 1980s and 1990s [10].

There is a paucity of data on the incidence of *S. flexneri* infection in the United Kingdom. In the 1980s, *S. flexneri* was the second most commonly isolated serotype of *Shigella* from patients with shigellosis in the United Kingdom [11]. In the 1990s, *S. flexneri* was the most commonly isolated serotype of *Shigella* from patients with shigellosis in the United Kingdom [12].

In the 1980s, *S. flexneri* was the second most commonly isolated serotype of *Shigella* from patients with shigellosis in the United Kingdom [11]. In the 1990s, *S. flexneri* was the most commonly isolated serotype of *Shigella* from patients with shigellosis in the United Kingdom [12].

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

[REDACTED]

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 7.5 million by 2020, and the number of people aged 75 and over to 5.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles:

- To ensure that older people have access to the same range of services as other groups of people.
- To ensure that older people are able to live independently for as long as possible.
- To ensure that older people are able to participate in decisions about their care and services.
- To ensure that older people are able to live in their own homes for as long as possible.

The strategy also sets out a number of specific targets for the NHS to meet the needs of older people. These include:

- To reduce the number of older people who are admitted to hospital.
- To reduce the number of older people who are discharged to care homes.
- To increase the number of older people who are able to live in their own homes.
- To increase the number of older people who are able to participate in decisions about their care and services.

The strategy also sets out a number of specific actions for the NHS to meet the needs of older people. These include:

- To develop a national strategy for the care of older people.
- To develop a national framework for the care of older people.
- To develop a national curriculum for the care of older people.
- To develop a national register of older people.

The strategy also sets out a number of specific actions for the NHS to meet the needs of older people. These include:

- To develop a national strategy for the care of older people.
- To develop a national framework for the care of older people.
- To develop a national curriculum for the care of older people.
- To develop a national register of older people.
