[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector. The Department of Health (2000) has set out a number of targets for the public sector, including a 10% reduction in the number of people employed in the public sector by 2005. This has led to a number of initiatives to improve the efficiency of the public sector, including the introduction of the 'New Deal' for the public sector (Department of Health 2000).

The 'New Deal' for the public sector is a set of initiatives designed to improve the efficiency of the public sector. It includes a number of measures, such as the introduction of performance-related pay, the introduction of a 'New Deal' for the public sector, and the introduction of a 'New Deal' for the public sector.

the 1990s, the number of people in the United States who are obese has increased by 50% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1997 (Health Survey for England 1997). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002).

Obesity is a complex condition, with many causes and consequences. It is a leading cause of death and disability in the United States, and is associated with a number of chronic diseases, including heart disease, diabetes, and cancer. Obesity is also a major risk factor for many other health problems, including high blood pressure, high cholesterol, and asthma. In addition, obesity is associated with a number of psychological problems, including depression and low self-esteem.

There are many factors that contribute to obesity, including genetics, diet, and physical activity. In the United States, the prevalence of obesity has increased significantly in the past few decades, and this is largely due to changes in diet and physical activity. In the United Kingdom, the prevalence of obesity has also increased, but at a slower rate than in the United States. This is due to a number of factors, including changes in diet and physical activity, and the availability of health care.
