[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

[REDACTED]

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase to 7.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' for the care of the elderly, which is based on the principles of 'active ageing' and 'positive ageing'.

The 'new paradigm' for the care of the elderly is based on the principles of 'active ageing' and 'positive ageing'. 'Active ageing' is defined as the process of optimising the opportunities for people to lead a healthy, active and fulfilling life. 'Positive ageing' is defined as the process of ensuring that people are able to live a life of dignity, respect and autonomy.

The 'new paradigm' for the care of the elderly is based on the principles of 'active ageing' and 'positive ageing'. 'Active ageing' is defined as the process of optimising the opportunities for people to lead a healthy, active and fulfilling life. 'Positive ageing' is defined as the process of ensuring that people are able to live a life of dignity, respect and autonomy.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on the following principles:

- Older people should be able to live independently and actively in their own homes for as long as possible.
- Older people should be able to access the services and support they need to live well.
- Older people should be able to participate in decisions about their care and support.
- Older people should be able to live in a safe and secure environment.
- Older people should be able to access the services and support they need to live well.

The strategy is based on the following principles: older people should be able to live independently and actively in their own homes for as long as possible; older people should be able to access the services and support they need to live well; older people should be able to participate in decisions about their care and support; older people should be able to live in a safe and secure environment; older people should be able to access the services and support they need to live well.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 85 and over has increased by 0.5 million in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has set out a strategy for the future of health care for older people. The strategy is based on the principle that older people should be able to live in their own homes for as long as possible, and that health care should be provided in a way that is appropriate to their needs. The strategy is based on the following principles:

- Older people should be able to live in their own homes for as long as possible.
- Health care should be provided in a way that is appropriate to the needs of older people.
- Older people should be able to access the services they need when they need them.
- Older people should be able to participate in decisions about their care.

The strategy is based on the principle that older people should be able to live in their own homes for as long as possible, and that health care should be provided in a way that is appropriate to their needs. The strategy is based on the following principles:

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which suggests that the two fields are closely related.
