The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 2.5 billion to 3.5 billion.

There are a number of factors which have contributed to the increase in the number of people in the world who are under 15 years of age. These include a decline in the death rate, a decline in the birth rate, and a decline in the age at which people are having children.

The decline in the death rate has been the result of a number of factors, including improvements in medical care, a decline in the incidence of infectious diseases, and a decline in the incidence of accidents and violence.

The decline in the birth rate has been the result of a number of factors, including a decline in the age at which people are having children, a decline in the number of children that people are having, and a decline in the number of people who are having children.

The decline in the age at which people are having children has been the result of a number of factors, including a decline in the age at which people are getting married, a decline in the age at which people are having children, and a decline in the number of people who are having children.

The decline in the number of children that people are having has been the result of a number of factors, including a decline in the number of children that people are having, a decline in the number of people who are having children, and a decline in the number of people who are having children.

The decline in the number of people who are having children has been the result of a number of factors, including a decline in the number of people who are having children, a decline in the number of people who are having children, and a decline in the number of people who are having children.

The decline in the number of people who are having children has been the result of a number of factors, including a decline in the number of people who are having children, a decline in the number of people who are having children, and a decline in the number of people who are having children.

the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype in children with acute bacterial dysentery [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1970s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [12]. In the 1980s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [13]. In the 1990s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [14].

The purpose of this study was to determine the prevalence of *S. flexneri* in the United Kingdom. The study was conducted in the United Kingdom, where *S. flexneri* is the most commonly isolated serotype from patients with acute bacterial dysentery. The study was conducted in the United Kingdom, where *S. flexneri* is the most commonly isolated serotype from patients with acute bacterial dysentery.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 1999). The number of people aged 85 and over has increased by 300,000 in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently; (2) to ensure that older people have access to the services they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following assumptions: (1) that older people are a valuable part of our society; (2) that older people have the right to live independently; (3) that older people have the right to access the services they need; and (4) that older people should be treated with respect and dignity. The strategy sets out a number of key objectives, which are to: (1) improve the lives of older people; (2) ensure that older people have the opportunity to live independently; (3) ensure that older people have access to the services they need; and (4) ensure that older people are treated with respect and dignity.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1998). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. This paper aims to provide a brief overview of the public sector in the UK, and to discuss the challenges that it faces. The paper is divided into three main sections: the first section discusses the structure of the public sector, the second section discusses the challenges that the public sector faces, and the third section discusses the ways in which the public sector can be improved.

the 1990s, the number of people in the United States who are obese has increased by 100% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1997 (Health Survey for England 1997). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002).

Obesity is a complex condition, and its aetiology is multifactorial. It is a result of an imbalance between energy intake and energy expenditure. The energy intake is determined by the amount of food and drink consumed, and the energy expenditure is determined by the amount of physical activity. The imbalance can be caused by a variety of factors, including genetics, environment, and lifestyle.

Obesity is a major public health problem because it is associated with a number of health problems, including heart disease, diabetes, and cancer. It is also a leading cause of disability and premature death. In the United States, obesity is the leading cause of death among children and adolescents (Flegal et al. 2002).

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1999, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1999, 88% of the public sector workforce were women, compared with 78% in 1980.

Another reason is that the public sector has a high proportion of women in its senior management. In 1999, 33% of the public sector senior management were women, compared with 23% in 1980.

A third reason is that the public sector has a high proportion of women in its part-time workforce. In 1999, 44% of the public sector workforce were part-time, compared with 34% in 1980.

There are a number of reasons why the public sector has a high proportion of women in its workforce, senior management and part-time workforce. One reason is that the public sector has a high proportion of women in its senior management. In 1999, 33% of the public sector senior management were women, compared with 23% in 1980.

Another reason is that the public sector has a high proportion of women in its part-time workforce. In 1999, 44% of the public sector workforce were part-time, compared with 34% in 1980.

A third reason is that the public sector has a high proportion of women in its senior management. In 1999, 33% of the public sector senior management were women, compared with 23% in 1980.
