the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1999, compared with 1.2 million in 1980.

There are a number of reasons why the public sector has become an important employer of people with disabilities. One reason is that the public sector has a long history of employing people with disabilities. In the 19th century, the public sector employed people with disabilities in a number of different roles, including as clerks, typists, and stenographers. In the 20th century, the public sector employed people with disabilities in a number of different roles, including as teachers, nurses, and social workers.

Another reason why the public sector has become an important employer of people with disabilities is that the public sector has a number of policies in place that encourage the employment of people with disabilities. For example, the public sector has a number of policies in place that encourage the employment of people with disabilities in a number of different roles, including as teachers, nurses, and social workers.

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]
