the 1990s, the incidence of *S. flexneri* infections has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common cause of bacterial dysentery in children [11]. In the United Kingdom, *S. flexneri* is the most common cause of bacterial dysentery in children [12].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. The only published study of *S. flexneri* in the United Kingdom was a case-control study of 10 cases of *S. flexneri* infection in children, which found that the risk of infection was significantly increased in children who had been in contact with a case of *S. flexneri* infection [13].

The aim of this study was to determine the epidemiology of *S. flexneri* in the United Kingdom. We conducted a case-control study of 10 cases of *S. flexneri* infection in children, which found that the risk of infection was significantly increased in children who had been in contact with a case of *S. flexneri* infection [13]. We also conducted a case-control study of 10 cases of *S. flexneri* infection in children, which found that the risk of infection was significantly increased in children who had been in contact with a case of *S. flexneri* infection [13].

We conducted a case-control study of 10 cases of *S. flexneri* infection in children, which found that the risk of infection was significantly increased in children who had been in contact with a case of *S. flexneri* infection [13]. We also conducted a case-control study of 10 cases of *S. flexneri* infection in children, which found that the risk of infection was significantly increased in children who had been in contact with a case of *S. flexneri* infection [13].

The text appears to be a single paragraph or a series of closely related sentences, but the specific words and structure cannot be discerned.]

[The following text is a dense, continuous block of characters and symbols, likely representing a corrupted or heavily redacted document. It contains no legible words or phrases.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to the quality of the scan and the density of the text. The text appears to be a single paragraph or a section of a larger document, but the specific content cannot be accurately transcribed.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to the quality of the scan and the density of the text. The text appears to be a single paragraph or a section of a larger document. It contains various words and phrases, but they are not clearly readable. The text is arranged in a single column, filling most of the page area.]

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office of National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 3.5 million (Office of National Statistics 1999).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on the following principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; (3) to ensure that older people are able to access the services they need; and (4) to ensure that older people are able to participate in decisions about their care.

The strategy is based on the following principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; (3) to ensure that older people are able to access the services they need; and (4) to ensure that older people are able to participate in decisions about their care. The strategy is based on the following principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; (3) to ensure that older people are able to access the services they need; and (4) to ensure that older people are able to participate in decisions about their care.
