the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 1999). The number of people aged 85 and over has increased by 300,000 in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on the following principles: older people should be able to live independently, safely and comfortably; older people should be able to participate in the community; and older people should be able to access the services they need.

The strategy is based on the following principles: older people should be able to live independently, safely and comfortably; older people should be able to participate in the community; and older people should be able to access the services they need. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 85 and over has increased by 0.5 million in the same period.

There is a growing awareness of the need to develop services to meet the needs of older people, and the need to ensure that the services that are developed are based on evidence of what works. This paper reports on a study that was designed to identify the needs of older people and to develop a service to meet those needs.

The study was carried out in the context of a local authority in the south of England. The local authority had a population of 150,000 and a budget of £100 million. The local authority was responsible for a range of services, including housing, social care, and health care.

The study was carried out in 1998 and 1999. The study was designed to identify the needs of older people and to develop a service to meet those needs. The study was carried out in two phases. The first phase was a needs assessment, and the second phase was the development of a service.

The needs assessment was carried out by a team of researchers. The team carried out a series of interviews with older people, and they also carried out a series of focus group discussions. The team also carried out a series of surveys, and they also carried out a series of observations.

The results of the needs assessment were used to develop a service. The service was designed to meet the needs of older people, and it was developed in a way that was based on evidence of what works. The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works.

The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works. The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works.

The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works. The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works.

The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works. The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works.

The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works. The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works.

The service was developed in a way that was based on the needs of older people, and it was developed in a way that was based on the evidence of what works.
