[The following text is a dense, continuous block of characters and symbols, likely representing a corrupted or redacted document. It contains no legible words or phrases.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

[REDACTED]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

[The following text is a dense, continuous block of characters and symbols, likely representing a corrupted or heavily redacted document. It contains no legible words or phrases.]

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'communication' field is defined as:

...the study of the nature, sources, uses, and management of communication, and the study of the communication of information. (p. 1)

These definitions are not mutually exclusive, and the two fields overlap significantly.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations 1999).

There are a number of reasons why the world population is ageing. First, the number of people who are under 15 years of age has decreased from 1.1 billion in 1990 to 0.9 billion in 2000. This is due to a decline in the birth rate, which has been caused by a number of factors, including a decline in the number of children born to women, a decline in the number of children born to women who are under 15 years of age, and a decline in the number of children born to women who are over 35 years of age.

Second, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Third, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Fourth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Fifth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Sixth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Seventh, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Eighth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.
