[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of closely related sentences, but the specific words and structure cannot be discerned.]

[The following text is a dense, continuous block of characters and symbols, likely representing a corrupted or redacted document. It contains no legible words or phrases.]

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) and the number of people in the private sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care in the public sector. This has led to a number of initiatives, including the introduction of the National Patient Safety Agency (NPSA) in 1999, the establishment of the National Clinical Audit Programme in 1999, and the introduction of the National Framework for Quality Improvement in 2000. These initiatives are all aimed at improving the quality of care in the public sector and ensuring that patients receive the best possible care.

The NPSA is a non-departmental public body that was established in 1999. Its main role is to monitor and improve the safety of the NHS. It does this by carrying out investigations into serious incidents, promoting best practice, and providing advice and support to NHS organisations.

The National Clinical Audit Programme is a programme of clinical audits that was established in 1999. Its main role is to improve the quality of care in the NHS by identifying areas for improvement and implementing measures to address these areas.

The National Framework for Quality Improvement is a framework that was introduced in 2000. It sets out the standards for quality improvement in the NHS and provides a framework for NHS organisations to implement quality improvement measures.

These initiatives are all aimed at improving the quality of care in the public sector and ensuring that patients receive the best possible care. They are part of a wider effort to reform the NHS and ensure that it is able to provide high-quality care to all patients.

The NHS is a public sector organisation that provides health care to the people of the UK. It is a large and complex organisation, and it is constantly evolving. The NHS is facing a number of challenges, including a growing demand for services, a shortage of staff, and a need to improve the quality of care.

The NHS is committed to providing high-quality care to all patients. It is constantly working to improve the quality of care and ensure that patients receive the best possible care. The NHS is a public sector organisation, and it is accountable to the public.

The NHS is a public sector organisation, and it is accountable to the public. It is constantly working to improve the quality of care and ensure that patients receive the best possible care. The NHS is a public sector organisation, and it is accountable to the public.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics, 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office for National Statistics, 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' of care for the ageing population. This paradigm is based on the principle of 'active ageing', which is the process of optimising the opportunities for people to lead healthy, active and productive lives. The Department of Health (1999) has identified a number of key areas for action in order to achieve this paradigm, including: (1) promoting healthy living; (2) preventing illness and disability; (3) providing care and support; and (4) promoting social participation.

The Department of Health (1999) has also identified a number of key areas for action in order to achieve this paradigm, including: (1) promoting healthy living; (2) preventing illness and disability; (3) providing care and support; and (4) promoting social participation. [The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to the quality of the scan and the density of the text. The text appears to be a single paragraph or a series of closely related sentences. The visible fragments of text are as follows:]

[Illegible text block]

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office of National Statistics 1999). The number of people aged 85 and over has increased by 300,000 in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently; (2) to ensure that older people have access to the services they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following assumptions: (1) that older people are a valuable resource; (2) that older people have the right to live independently; (3) that older people have the right to access the services they need; and (4) that older people should be treated with respect and dignity. The strategy is based on the following principles: (1) to ensure that older people have the opportunity to live independently; (2) to ensure that older people have access to the services they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following principles: (1) to ensure that older people have the opportunity to live independently; (2) to ensure that older people have access to the services they need; and (3) to ensure that older people are treated with respect and dignity. the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported to be the most common serotype of *S. flexneri* isolated from children with acute colitis [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1970s, *S. flexneri* was the most commonly isolated serotype of *S. flexneri* from patients with acute colitis in the United Kingdom [12]. In the 1980s, *S. flexneri* was the most commonly isolated serotype of *S. flexneri* from patients with acute colitis in the United Kingdom [13]. In the 1990s, *S. flexneri* was the most commonly isolated serotype of *S. flexneri* from patients with acute colitis in the United Kingdom [14].
