the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the world population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. In 1980, the average woman in the world had 2.5 children. In 1999, the average woman in the world had 2.7 children.

Another reason why the world population is growing so rapidly is that the number of people who are surviving to old age has increased. In 1980, the average person in the world lived for 55 years. In 1999, the average person in the world lived for 65 years.

There are a number of reasons why the number of people who are surviving to old age has increased. One of the main reasons is that the number of people who are surviving to old age has increased. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 7.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.

The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society. the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.1 billion.

There are a number of factors which have contributed to the increase in the number of people in the world who are under 15 years of age. These factors include a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

The decline in the death rate has been the most significant factor in the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including improvements in medical care, a decline in the incidence of infectious diseases, and a decline in the incidence of violence.

The decline in the birth rate has also contributed to the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including a decline in the number of children born to women, a decline in the number of children born to men, and a decline in the number of children born to couples.

The decline in the rate of migration has also contributed to the increase in the number of people in the world who are under 15 years of age. This decline has been due to a number of factors, including a decline in the number of people who are migrating from one country to another, a decline in the number of people who are migrating from one region to another, and a decline in the number of people who are migrating from one social class to another.

The increase in the number of people in the world who are under 15 years of age has a number of implications. These implications include a decline in the number of people who are in the workforce, a decline in the number of people who are paying taxes, and a decline in the number of people who are contributing to the economy.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the environment. These implications include a decline in the number of people who are using natural resources, a decline in the number of people who are polluting the environment, and a decline in the number of people who are contributing to climate change.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the future. These implications include a decline in the number of people who are living in poverty, a decline in the number of people who are living in slums, and a decline in the number of people who are living in the developing world.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the quality of life. These implications include a decline in the number of people who are healthy, a decline in the number of people who are educated, and a decline in the number of people who are employed.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the future of the world. These implications include a decline in the number of people who are living in peace, a decline in the number of people who are living in freedom, and a decline in the number of people who are living in a world that is free from violence.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the future of the world. These implications include a decline in the number of people who are living in a world that is free from poverty, a decline in the number of people who are living in a world that is free from hunger, and a decline in the number of people who are living in a world that is free from disease.

The increase in the number of people in the world who are under 15 years of age also has a number of implications for the future of the world. These implications include a decline in the number of people who are living in a world that is free from war, a decline in the number of people who are living in a world that is free from terrorism, and a decline in the number of people who are living in a world that is free from crime.
