[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a formal document or report. The text is too blurry and low-contrast to transcribe accurately. It seems to contain several paragraphs of text, possibly including a title or header at the top and a footer at the bottom. The content is largely illegible due to the quality of the scan.]

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which suggests that the two fields are closely related.

the 1990s, the number of people in the United States with a college degree has increased from 15% to 25% (U.S. Department of Education, 1996). The number of people with a high school diploma has increased from 85% to 90% (U.S. Department of Education, 1996).

There is a growing concern that the current educational system is not preparing students for the challenges of the 21st century. The National Education Goals Panel (1993) has identified a number of key areas for improvement, including: (a) increasing the quality of the teaching force, (b) improving the quality of the curriculum, (c) increasing the use of technology, and (d) improving the quality of the assessment system.
