[The following text is a dense, continuous block of characters and symbols, likely representing a corrupted or heavily redacted document. It contains no legible words or phrases.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of closely related sentences. The text is too blurry and low-contrast to transcribe accurately, but it seems to contain several lines of prose.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of closely related sentences, but the specific words and structure cannot be discerned.]

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of the ageing population. The Department of Health (2000) has identified the need to develop a new approach to the care of the ageing population, one that is based on the principles of 'active ageing'. This approach is based on the idea that ageing is a process, and that the health and social care needs of the ageing population are not fixed, but can change over time. The Department of Health (2000) has identified the need to develop a new approach to the care of the ageing population, one that is based on the principles of 'active ageing'.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1995, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has become an important provider of social services, such as health care, education, and social housing. These services are essential for the well-being of the population, and they are provided by the public sector.

Another reason why the public sector has become an important employer of women is that it has become an important provider of social security. The public sector provides social security benefits, such as unemployment benefits, sickness benefits, and pension benefits. These benefits are essential for the well-being of the population, and they are provided by the public sector.

A third reason why the public sector has become an important employer of women is that it has become an important provider of social services for women. The public sector provides social services, such as day care, after-school care, and elder care. These services are essential for the well-being of women, and they are provided by the public sector.
