the 1990s, the incidence of *S. flexneri* infections has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common cause of bacterial dysentery in children [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1980s, *S. flexneri* was the most commonly isolated enteric pathogen from patients with acute bacterial dysentery in the United Kingdom [12]. In the 1990s, *S. flexneri* was the most commonly isolated enteric pathogen from patients with acute bacterial dysentery in the United Kingdom [13].

The aim of this study was to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been launched in the UK to address this need. The Department of Health has launched the 'Ageing Well' initiative, which aims to improve the lives of older people by providing them with the services and support they need. The Department of Health has also launched the 'Ageing Well' campaign, which aims to raise awareness of the needs of older people and to encourage people to get involved in helping them.

The 'Ageing Well' initiative is a multi-agency effort involving the Department of Health, the Department of Social Security, the Department of the Environment, and the Department of Transport. The initiative is aimed at improving the lives of older people by providing them with the services and support they need. The initiative is also aimed at raising awareness of the needs of older people and at encouraging people to get involved in helping them.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social housing and public transport.

The public sector is a major source of employment in the UK, and it is also a major source of revenue for the state. The public sector is funded by a variety of sources, including taxes, fees, and grants. The public sector is also subject to a variety of constraints, including the need to provide services to the public and the need to operate within a budget.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for the ageing population, which sets out the government's commitment to improve the health and quality of life of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the activities of their communities; and (4) to ensure that older people are able to contribute to society.

The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the activities of their communities; and (4) to ensure that older people are able to contribute to society. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the activities of their communities; and (4) to ensure that older people are able to contribute to society.
