the 1990s, the number of people in the United States who are obese has increased by 100% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1997 (Health Survey for England 1997). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002).

Obesity is a complex condition, and its aetiology is multifactorial. It is a result of an imbalance between energy intake and energy expenditure. The energy intake is determined by the amount of food and drink consumed, and the energy expenditure is determined by the amount of physical activity. The imbalance between energy intake and energy expenditure is the result of a combination of genetic, environmental, and behavioural factors.

Obesity is a major public health problem, and it is associated with a number of health problems, including type 2 diabetes, heart disease, and stroke. It is also associated with a number of psychological problems, including depression and anxiety. Obesity is a complex condition, and its aetiology is multifactorial. It is a result of an imbalance between energy intake and energy expenditure.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1995, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1995, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are full-time and permanent. In 1995, 68% of the public sector workforce were employed on full-time contracts, compared with 58% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are essential to the functioning of the state.

There are a number of other reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of jobs that are well-paid. In 1995, the average salary of a public sector employee was £18,000, compared with £15,000 in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are in the higher grades of the public sector pay scale.

There are a number of other reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of jobs that are in the public sector. In 1995, 88% of the public sector workforce were employed in the public sector, compared with 78% in 1980.
