the information science community. The first is the lack of a common language. The second is the lack of a common methodology. The third is the lack of a common framework.

The first two problems are relatively easy to solve. The third is more difficult. It requires a common framework that can be used to develop a common language and a common methodology.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998 (Department of Health 1999). The number of people employed in the health service has increased by 1.2 million, from 1.5 million in 1980 to 2.7 million in 1998 (Department of Health 1999).

There is a growing emphasis on the need to improve the quality of care and to ensure that the health service is cost-effective. This has led to a number of initiatives, including the introduction of clinical guidelines, the development of clinical audit, and the implementation of patient safety programmes. The aim of these initiatives is to ensure that the health service is providing the best possible care to its patients, while also being cost-effective.

The health service is also facing a number of challenges, including a growing demand for services, a shortage of staff, and a need to improve the efficiency of the service. The health service is also facing a number of challenges, including a growing demand for services, a shortage of staff, and a need to improve the efficiency of the service. The health service is also facing a number of challenges, including a growing demand for services, a shortage of staff, and a need to improve the efficiency of the service.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

...the study of the processes of communication production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information science' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information studies' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information technology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information systems' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information management' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information policy' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information law' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information ethics' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information education' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) and the number of people in the public sector who are employed in the health sector has increased by 1.2 million (from 1.3 million in 1980 to 2.5 million in 1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care provided in the public sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which sets out the framework for the regulation of health care providers. The Act requires health care providers to ensure that they provide a high standard of care, and to be held accountable for their performance. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which sets out the framework for the regulation of health care providers.

The Health Care Act 1999 also sets out the framework for the regulation of health care providers. The Act requires health care providers to ensure that they provide a high standard of care, and to be held accountable for their performance. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which sets out the framework for the regulation of health care providers. The Act requires health care providers to ensure that they provide a high standard of care, and to be held accountable for their performance.
