the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social housing and public transport.

The public sector is a major source of employment in the UK, and it is also a major source of revenue for the state. The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (1999) has identified the need to develop a new approach to the health and social care of older people, and to ensure that the needs of older people are met in a timely and effective manner. The Department of Health (1999) has identified the need to develop a new approach to the health and social care of older people, and to ensure that the needs of older people are met in a timely and effective manner.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for the ageing population, which sets out the government's commitment to improve the health and well-being of older people. The strategy is based on three main principles: (1) to improve the health and well-being of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.

The strategy is based on three main principles: (1) to improve the health and well-being of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1999, compared with 1.2 million in 1980.

There are a number of reasons why the public sector has become an important employer of people with disabilities. One reason is that the public sector has a long history of employing people with disabilities. In the 19th century, the public sector employed people with disabilities in a number of different roles, including as clerks, typists, and stenographers. In the 20th century, the public sector continued to employ people with disabilities in a variety of roles, including as teachers, nurses, and social workers.

Another reason why the public sector has become an important employer of people with disabilities is that the public sector has a number of advantages over the private sector. One advantage is that the public sector is not subject to the same profit pressures as the private sector. This means that the public sector can afford to pay people with disabilities a fair wage, even if they are not as productive as people without disabilities. Another advantage is that the public sector has a number of policies in place that make it easier for people with disabilities to work. For example, the public sector has a number of policies that make it easier for people with disabilities to access the workplace, such as providing accessible parking spaces and accessible public transport.

There are a number of challenges that the public sector faces in employing people with disabilities. One challenge is that the public sector has a number of policies in place that make it difficult for people with disabilities to work. For example, the public sector has a number of policies that make it difficult for people with disabilities to access the workplace, such as providing accessible parking spaces and accessible public transport. Another challenge is that the public sector has a number of policies in place that make it difficult for people with disabilities to be promoted. For example, the public sector has a number of policies that make it difficult for people with disabilities to be promoted to senior positions.

There are a number of ways that the public sector can improve its employment of people with disabilities. One way is to provide more training and development opportunities for people with disabilities. Another way is to provide more support for people with disabilities in the workplace. For example, the public sector could provide more accessible parking spaces and accessible public transport. The public sector could also provide more support for people with disabilities to be promoted to senior positions.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been launched to address this need. The Department of Health has launched the 'Ageing Well' initiative, which aims to improve the lives of older people by providing them with the services they need to live independently and safely. The initiative includes a range of services, including home care, day care, and residential care. The Department of Health has also launched the 'Ageing Well' website, which provides information and advice on a range of issues affecting older people.

The 'Ageing Well' initiative is a key part of the government's strategy for ageing. It is designed to ensure that older people have the services they need to live independently and safely. The initiative includes a range of services, including home care, day care, and residential care. The Department of Health has also launched the 'Ageing Well' website, which provides information and advice on a range of issues affecting older people.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse organisation, and it is difficult to define what it is. The public sector is often defined as the part of the economy that is owned and controlled by the state. This includes the government, local authorities, and public corporations. The public sector is also often defined as the part of the economy that provides public services. This includes the health service, the education system, and the social security system.

The public sector is a major employer in the UK, and it is important to understand how it is managed and how it is funded. The public sector is often managed in a way that is different from the way in which the private sector is managed. The public sector is often managed in a way that is more bureaucratic and more hierarchical than the private sector. The public sector is also often funded in a way that is different from the way in which the private sector is funded. The public sector is often funded by the state, while the private sector is often funded by the market.

100

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations, 1999).

There are a number of reasons why the world's population is ageing. First, the number of people who are aged 65 and over has increased because of the increase in life expectancy. Second, the number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive. Third, the number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive.

The increase in the number of people who are aged 65 and over has a number of implications for the world's population. First, it means that there are more people who are aged 65 and over who are still alive. Second, it means that there are more people who are aged 65 and over who are still alive.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 55% of public sector employees being women in 1995, compared with 45% in 1980. The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age. In 1995, 1.5 million people over 50 years of age were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age. In 1995, 1.5 million people under 25 years of age were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from ethnic minorities. In 1995, 1.5 million people from ethnic minorities were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from the Caribbean. In 1995, 1.5 million people from the Caribbean were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from the Indian subcontinent. In 1995, 1.5 million people from the Indian subcontinent were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from Pakistan. In 1995, 1.5 million people from Pakistan were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from Bangladesh. In 1995, 1.5 million people from Bangladesh were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from Africa. In 1995, 1.5 million people from Africa were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from Asia. In 1995, 1.5 million people from Asia were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from the Middle East. In 1995, 1.5 million people from the Middle East were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from the Pacific. In 1995, 1.5 million people from the Pacific were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from the Americas. In 1995, 1.5 million people from the Americas were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from the Caribbean. In 1995, 1.5 million people from the Caribbean were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from the Indian subcontinent. In 1995, 1.5 million people from the Indian subcontinent were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from Pakistan. In 1995, 1.5 million people from Pakistan were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from Bangladesh. In 1995, 1.5 million people from Bangladesh were employed in the public sector, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on the following principles: older people should be able to live independently, safely and comfortably; older people should be able to participate in the community; and older people should be able to access the services and support they need.

The strategy is based on the following principles: older people should be able to live independently, safely and comfortably; older people should be able to participate in the community; and older people should be able to access the services and support they need. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' for the care of the elderly. This paradigm is based on the principle of 'active ageing', which is the process of maintaining and enhancing the functional ability of older people to live independently and to participate in society. The Department of Health (1999) has identified a number of key areas for action in order to achieve this paradigm, including: (1) promoting the health and well-being of older people; (2) ensuring that older people have access to the services and resources they need to live independently; and (3) ensuring that older people are able to participate in society.

One of the key areas for action is the need to develop strategies to promote the health and well-being of older people. This includes the need to develop strategies to prevent the onset of chronic disease and to manage chronic disease when it does occur. The Department of Health (1999) has identified a number of key areas for action in order to achieve this, including: (1) promoting the health and well-being of older people; (2) ensuring that older people have access to the services and resources they need to live independently; and (3) ensuring that older people are able to participate in society.

One of the key areas for action is the need to develop strategies to ensure that older people have access to the services and resources they need to live independently. This includes the need to develop strategies to ensure that older people have access to housing, transport, and social services. The Department of Health (1999) has identified a number of key areas for action in order to achieve this, including: (1) promoting the health and well-being of older people; (2) ensuring that older people have access to the services and resources they need to live independently; and (3) ensuring that older people are able to participate in society.

One of the key areas for action is the need to develop strategies to ensure that older people are able to participate in society. This includes the need to develop strategies to ensure that older people are able to participate in community activities, education, and employment. The Department of Health (1999) has identified a number of key areas for action in order to achieve this, including: (1) promoting the health and well-being of older people; (2) ensuring that older people have access to the services and resources they need to live independently; and (3) ensuring that older people are able to participate in society.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations 1999).

There are a number of reasons why the world population is ageing. First, the number of people who are under 15 years of age has decreased from 1.1 billion in 1990 to 0.9 billion in 2000. This is due to a decline in the birth rate, which has been caused by a number of factors, including a decline in the number of children born to women, a decline in the number of children born to women who are under 15 years of age, and a decline in the number of children born to women who are over 35 years of age.

Second, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Third, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Fourth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Fifth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Sixth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Seventh, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

Eighth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-infectious diseases, and a decline in the number of people who die from accidents.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1995, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has become an important provider of social services, such as health care, education, and social housing. Another reason is that the public sector has become an important provider of social security, such as unemployment benefits and state pensions. A third reason is that the public sector has become an important provider of social care, such as day care and residential care.

The public sector has also become an important employer of women because it has become an important provider of social services, such as health care, education, and social housing. Another reason is that the public sector has become an important provider of social security, such as unemployment benefits and state pensions. A third reason is that the public sector has become an important provider of social care, such as day care and residential care.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1995, compared with 4.5 million in 1980. The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age. In 1995, 1.5 million people over 50 years of age were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age. In 1995, 1.5 million people under 25 years of age were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from ethnic minorities. In 1995, 1.5 million people from ethnic minorities were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from the Caribbean. In 1995, 1.5 million people from the Caribbean were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from the Indian subcontinent. In 1995, 1.5 million people from the Indian subcontinent were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from Pakistan. In 1995, 1.5 million people from Pakistan were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from Bangladesh. In 1995, 1.5 million people from Bangladesh were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from Africa. In 1995, 1.5 million people from Africa were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from Asia. In 1995, 1.5 million people from Asia were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from the Middle East. In 1995, 1.5 million people from the Middle East were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from the Pacific. In 1995, 1.5 million people from the Pacific were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from the Americas. In 1995, 1.5 million people from the Americas were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from the Caribbean. In 1995, 1.5 million people from the Caribbean were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from the Indian subcontinent. In 1995, 1.5 million people from the Indian subcontinent were employed in the public sector, compared with 1 million in 1980.

The public sector has also become an important employer of people who are from Pakistan. In 1995, 1.5 million people from Pakistan were employed in the public sector, compared with 1 million in 1980. The public sector has also become an important employer of people who are from Bangladesh. In 1995, 1.5 million people from Bangladesh were employed in the public sector, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on the following principles: older people should be able to live independently, safely and comfortably; older people should be able to participate in the life of their community; and older people should be able to access the services and support they need. The strategy is being implemented through a number of measures, including: increasing the number of care homes; increasing the number of people working in the care sector; and increasing the number of people who are able to live independently.

The Department of Health (1999) also states that the government is committed to improving the lives of older people by ensuring that they have access to the services and support they need. This includes ensuring that older people have access to housing, health care, social care, and other services. The government is also committed to ensuring that older people are able to participate in the life of their community. This includes ensuring that older people have access to leisure facilities, transport, and other services.

The Department of Health (1999) also states that the government is committed to ensuring that older people are able to live independently, safely and comfortably. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) and the number of people in the private sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) (Department of Social Security 2000).

There is a growing emphasis on the need to improve the quality of care and services provided by the public sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which aims to improve the quality of care and services provided by the public sector. The Health Care Act 1999 also aims to improve the quality of care and services provided by the private sector.

The Health Care Act 1999 also aims to improve the quality of care and services provided by the private sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which aims to improve the quality of care and services provided by the private sector.

The Health Care Act 1999 also aims to improve the quality of care and services provided by the private sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which aims to improve the quality of care and services provided by the private sector.

the 1990s, the incidence of *S. flexneri* infections has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common cause of bacterial dysentery in children [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. The only published study of *S. flexneri* in the United Kingdom was by Smith *et al.* [12], who reported that *S. flexneri* was the most common serotype of *Shigella* isolated from patients with bacterial dysentery in the United Kingdom in 1987. The serotypes of *S. flexneri* isolated were 2, 3, 4, 5, 6, 7, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

The aim of this study was to determine the prevalence of *S. flexneri* in the United Kingdom, to identify the serotypes of *S. flexneri* isolated, and to determine the risk factors for *S. flexneri* infection.

METHODS

Study area

The study was conducted in the United Kingdom, where the incidence of *S. flexneri* infections has increased in the 1990s [10]. The study was conducted in the United Kingdom, where the incidence of *S. flexneri* infections has increased in the 1990s [10].

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care in the public sector. The Department of Health (2000) has set out a number of key objectives for the public sector, including: 'to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care'.

The Department of Health (2000) has also set out a number of key objectives for the public sector, including: 'to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care'.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1999, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1999, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are part-time or flexible. In 1999, 28% of the public sector workforce were employed on part-time or flexible contracts, compared with 18% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

A third reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are well paid. In 1999, the average salary of a public sector employee was £20,000, compared with £15,000 in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

There are a number of other reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of jobs that are secure. In 1999, 88% of the public sector workforce were employed on permanent contracts, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are well located. In 1999, 28% of the public sector workforce were employed in London, compared with 18% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

A third reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are well matched to the skills of women. In 1999, 88% of the public sector workforce were employed in jobs that required a degree or higher qualification, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

There are a number of other reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of jobs that are well paid. In 1999, the average salary of a public sector employee was £20,000, compared with £15,000 in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 in the USA (U.S. Census Bureau 2000). The number of people aged 65 and over in the UK is projected to increase by 2.5 million by 2020 (Office for National Statistics 2001).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The World Health Organization (WHO) has developed a 'Global Strategy on Ageing and Health' (WHO 1999) which aims to 'improve the health and well-being of older people and to ensure that they are able to live full and active lives'. The WHO has also developed a 'Global Strategy on Ageing and Health' (WHO 1999) which aims to 'improve the health and well-being of older people and to ensure that they are able to live full and active lives'.

the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported to be the most common serotype of *Shigella* isolated from children with shigellosis [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. The only published study of *S. flexneri* in the United Kingdom was by Roberts *et al.* [12], who reported the results of a case-control study of *S. flexneri* infection in children in 1990. The study was limited by the small number of cases and the lack of a well-defined population.

The purpose of this study was to determine the epidemiology of *S. flexneri* infection in children in the United Kingdom. The study was designed to determine the incidence of *S. flexneri* infection in children in the United Kingdom, to determine the risk factors for *S. flexneri* infection, and to determine the serotypes of *S. flexneri* isolated from children in the United Kingdom.

The study was conducted in the United Kingdom, and the results are presented in this paper.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become an important employer of people with mental health problems, and the number of people with mental health problems employed in the public sector has increased from 10,000 in 1980 to 20,000 in 1999 (Mental Health Foundation, 2000).

There is a growing awareness of the need to improve the mental health of people in the public sector, and the need to develop strategies to prevent mental health problems in the public sector. The Mental Health Foundation (2000) has identified a number of key areas for research and development in this area, including the need to develop strategies to prevent mental health problems in the public sector.

The purpose of this paper is to review the current state of research and development in this area, and to identify key areas for research and development. The paper is organized as follows. First, we review the current state of research and development in this area. Second, we identify key areas for research and development. Third, we discuss the implications of our findings for practice.

The current state of research and development in this area is characterized by a number of key findings. First, there is a growing awareness of the need to improve the mental health of people in the public sector, and the need to develop strategies to prevent mental health problems in the public sector. Second, there is a growing awareness of the need to develop strategies to prevent mental health problems in the public sector.

The need to develop strategies to prevent mental health problems in the public sector is a key area for research and development. The Mental Health Foundation (2000) has identified a number of key areas for research and development in this area, including the need to develop strategies to prevent mental health problems in the public sector.

The need to develop strategies to prevent mental health problems in the public sector is a key area for research and development. The Mental Health Foundation (2000) has identified a number of key areas for research and development in this area, including the need to develop strategies to prevent mental health problems in the public sector.

The need to develop strategies to prevent mental health problems in the public sector is a key area for research and development. The Mental Health Foundation (2000) has identified a number of key areas for research and development in this area, including the need to develop strategies to prevent mental health problems in the public sector.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2000). The number of people aged 65 and over in the UK is projected to increase from 10.5 million in 1999 to 12.5 million in 2020, with the number of people aged 75 and over increasing from 4.5 million to 6.5 million in the same period (Office for National Statistics 2000).

There is a growing awareness of the need to address the health care needs of the ageing population. The Department of Health (2000) has identified the need to develop a new approach to health care for the ageing population, one that is based on a partnership between the health care system and the community. This approach is based on the principle that health care should be provided in the community, rather than in the hospital, and that the health care system should work in partnership with the community to meet the needs of the ageing population.

The Department of Health (2000) has identified a number of key areas for action in order to develop a new approach to health care for the ageing population. These include: (1) the need to develop a new approach to health care for the ageing population, one that is based on a partnership between the health care system and the community; (2) the need to develop a new approach to health care for the ageing population, one that is based on a partnership between the health care system and the community; and (3) the need to develop a new approach to health care for the ageing population, one that is based on a partnership between the health care system and the community.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' of care for the ageing population, which is based on the principles of 'active ageing' and 'lifestyle medicine'. The 'new paradigm' is based on the principles of 'active ageing' and 'lifestyle medicine', which are aimed at promoting the health and well-being of the ageing population.

The 'new paradigm' is based on the principles of 'active ageing' and 'lifestyle medicine', which are aimed at promoting the health and well-being of the ageing population. The 'new paradigm' is based on the principles of 'active ageing' and 'lifestyle medicine', which are aimed at promoting the health and well-being of the ageing population. The 'new paradigm' is based on the principles of 'active ageing' and 'lifestyle medicine', which are aimed at promoting the health and well-being of the ageing population.

The 'new paradigm' is based on the principles of 'active ageing' and 'lifestyle medicine', which are aimed at promoting the health and well-being of the ageing population. The 'new paradigm' is based on the principles of 'active ageing' and 'lifestyle medicine', which are aimed at promoting the health and well-being of the ageing population.

[REDACTED]

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999), and the number of people in the public sector who are employed in health care has increased by 1.2 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the importance of the public sector in the provision of health care services, and the need for the public sector to be able to meet the needs of the population. This has led to a number of initiatives to improve the performance of the public sector, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organized and managed, and to a number of improvements in the way that health care services are provided.

One of the key areas of focus for these initiatives has been the need to improve the efficiency of the public sector. This has led to a number of initiatives to improve the efficiency of the public sector, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organized and managed, and to a number of improvements in the way that health care services are provided.

Another key area of focus for these initiatives has been the need to improve the quality of health care services. This has led to a number of initiatives to improve the quality of health care services, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organized and managed, and to a number of improvements in the way that health care services are provided.

One of the key areas of focus for these initiatives has been the need to improve the access to health care services. This has led to a number of initiatives to improve the access to health care services, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organized and managed, and to a number of improvements in the way that health care services are provided.

Another key area of focus for these initiatives has been the need to improve the sustainability of the public sector. This has led to a number of initiatives to improve the sustainability of the public sector, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organized and managed, and to a number of improvements in the way that health care services are provided.

One of the key areas of focus for these initiatives has been the need to improve the transparency of the public sector. This has led to a number of initiatives to improve the transparency of the public sector, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organized and managed, and to a number of improvements in the way that health care services are provided.

Another key area of focus for these initiatives has been the need to improve the accountability of the public sector. This has led to a number of initiatives to improve the accountability of the public sector, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organized and managed, and to a number of improvements in the way that health care services are provided.

One of the key areas of focus for these initiatives has been the need to improve the effectiveness of the public sector. This has led to a number of initiatives to improve the effectiveness of the public sector, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organized and managed, and to a number of improvements in the way that health care services are provided.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the world population is increasing so rapidly. One of the main reasons is that the number of children born to each woman has increased. In 1980, the average woman in the world had 2.5 children. In 1999, the average woman in the world had 2.7 children.

Another reason why the world population is increasing so rapidly is that the number of people who are surviving to old age has increased. In 1980, the average person in the world lived for 55 years. In 1999, the average person in the world lived for 65 years.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1998). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. This paper aims to provide a brief overview of the public sector in the UK, and to discuss the challenges that it faces. The paper is divided into three main sections: the first section discusses the structure of the public sector, the second section discusses the challenges that the public sector faces, and the third section discusses the ways in which the public sector can be improved.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1999, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1999, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are part-time or flexible. In 1999, 28% of the public sector workforce were employed on part-time or flexible contracts, compared with 18% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

A third reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are well paid. In 1999, the average salary of a public sector employee was £20,000, compared with £15,000 in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.
