the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1999, compared with 3.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1999, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are full-time and permanent. In 1999, 68% of the public sector workforce were employed on full-time contracts, compared with 58% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are essential to the functioning of the state, such as those in the health and education sectors.

Finally, the public sector has become an important employer of women because it has a high proportion of jobs that are well-paid. In 1999, the average salary for a woman in the public sector was £21,000, compared with £18,000 in 1980. This is due to the fact that the public sector has a high proportion of jobs that are in the higher pay bands, such as those in the senior management and professional sectors.

There are a number of implications of the fact that the public sector has become an important employer of women. One implication is that the public sector has become a more important part of the economy. This is because the public sector now employs more than 10% of the UK workforce, compared with 8% in 1980. This has led to the public sector becoming a more important part of the economy, and one that is more likely to be affected by economic downturns.

Another implication of the fact that the public sector has become an important employer of women is that it has become a more important part of the social security system. This is because the public sector now employs more than 10% of the UK workforce, compared with 8% in 1980. This has led to the public sector becoming a more important part of the social security system, and one that is more likely to be affected by changes in social security policy.

Finally, the fact that the public sector has become an important employer of women has led to a number of other changes in the public sector. For example, the public sector has become more important in the provision of social services, such as housing and social care. This is because the public sector now employs more than 10% of the UK workforce, compared with 8% in 1980.

In conclusion, the public sector has become an important employer of women in the UK. This is due to a number of factors, including the fact that the public sector has a high proportion of women in its workforce, a high proportion of jobs that are full-time and permanent, and a high proportion of jobs that are well-paid. The fact that the public sector has become an important employer of women has led to a number of other changes in the public sector, including its becoming a more important part of the economy, the social security system, and the provision of social services.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 7.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' for the care of the elderly, which is based on the principles of 'active ageing'. This paradigm is based on the idea that older people should be able to live independently, actively and with dignity. It is based on the idea that older people should be able to participate in the community and to contribute to society. The Department of Health (1999) has identified a number of key areas for action in order to achieve this paradigm, including: improving the health of older people, improving the social conditions of older people, and improving the services available to older people.

The Department of Health (1999) has also identified a number of key areas for action in order to improve the health of older people. These include: improving the prevention of disease and disability, improving the management of disease and disability, and improving the rehabilitation of older people. The Department of Health (1999) has also identified a number of key areas for action in order to improve the social conditions of older people. These include: improving the housing of older people, improving the transport of older people, and improving the leisure and cultural activities of older people.

The Department of Health (1999) has also identified a number of key areas for action in order to improve the services available to older people. These include: improving the primary care services available to older people, improving the secondary care services available to older people, and improving the community care services available to older people. The Department of Health (1999) has also identified a number of key areas for action in order to improve the training and development of the workforce in the care of older people. These include: improving the training and development of the health care workforce, and improving the training and development of the social care workforce.

The Department of Health (1999) has also identified a number of key areas for action in order to improve the research and evaluation of the care of older people. These include: improving the research and evaluation of the health of older people, improving the research and evaluation of the social conditions of older people, and improving the research and evaluation of the services available to older people. The Department of Health (1999) has also identified a number of key areas for action in order to improve the public and professional awareness of the needs of older people. These include: improving the public and professional awareness of the health of older people, improving the public and professional awareness of the social conditions of older people, and improving the public and professional awareness of the services available to older people.

The Department of Health (1999) has also identified a number of key areas for action in order to improve the funding of the care of older people. These include: improving the funding of the health care services available to older people, improving the funding of the social care services available to older people, and improving the funding of the community care services available to older people. The Department of Health (1999) has also identified a number of key areas for action in order to improve the governance of the care of older people. These include: improving the governance of the health care services available to older people, improving the governance of the social care services available to older people, and improving the governance of the community care services available to older people.

The Department of Health (1999) has also identified a number of key areas for action in order to improve the monitoring and evaluation of the care of older people. These include: improving the monitoring and evaluation of the health of older people, improving the monitoring and evaluation of the social conditions of older people, and improving the monitoring and evaluation of the services available to older people. The Department of Health (1999) has also identified a number of key areas for action in order to improve the communication of the care of older people. These include: improving the communication of the health of older people, improving the communication of the social conditions of older people, and improving the communication of the services available to older people.

The Department of Health (1999) has also identified a number of key areas for action in order to improve the leadership and management of the care of older people. These include: improving the leadership and management of the health care services available to older people, improving the leadership and management of the social care services available to older people, and improving the leadership and management of the community care services available to older people. The Department of Health (1999) has also identified a number of key areas for action in order to improve the partnership working of the care of older people. These include: improving the partnership working of the health care services available to older people, improving the partnership working of the social care services available to older people, and improving the partnership working of the community care services available to older people.

The Department of Health (1999) has also identified a number of key areas for action in order to improve the quality of the care of older people. These include: improving the quality of the health care services available to older people, improving the quality of the social care services available to older people, and improving the quality of the community care services available to older people.
