[The following text is a dense, continuous block of text, likely a scan of a document page. It contains numerous lines of text, many of which are illegible due to the quality of the scan. The text appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of closely related sentences. Due to the extreme density and illegibility, the specific content cannot be transcribed accurately.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has become a major employer in the UK, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major employer in the UK, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. The public sector has become a major employer in the UK, and its growth has been a key factor in the overall growth of the economy.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office of National Statistics 1999). The number of people aged 85 and over has increased by 0.5 million in the same period.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has set out a strategy for the future of health care for older people. This strategy is based on the following principles:

- The needs of older people should be met in the community, wherever possible.
- The needs of older people should be met in a way that is consistent with their wishes and preferences.
- The needs of older people should be met in a way that is consistent with the values and principles of the NHS.

The strategy also sets out a number of key objectives for the future of health care for older people. These objectives are:

- To ensure that older people have access to the services they need to live well in the community.
- To ensure that older people have access to the services they need to live well in care homes.
- To ensure that older people have access to the services they need to live well in hospital.

The strategy also sets out a number of key actions for the future of health care for older people. These actions are:

- To develop services to meet the needs of older people in the community.
- To develop services to meet the needs of older people in care homes.
- To develop services to meet the needs of older people in hospital.

The strategy also sets out a number of key measures for the future of health care for older people. These measures are:

- To develop services to meet the needs of older people in the community.
- To develop services to meet the needs of older people in care homes.
- To develop services to meet the needs of older people in hospital.

The strategy also sets out a number of key targets for the future of health care for older people. These targets are:

- To develop services to meet the needs of older people in the community.
- To develop services to meet the needs of older people in care homes.
- To develop services to meet the needs of older people in hospital.

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of lines of prose, but the specific words and sentences cannot be transcribed accurately.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a formal document or report. The text is too blurry and low-contrast to transcribe accurately. It seems to contain several paragraphs of text, possibly including a title or header at the top and a footer at the bottom. The content is illegible due to the quality of the scan.]

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'communication' field is defined as:

...the study of the nature, sources, uses, and management of communication, and the study of the communication of information. (p. 1)

The 'information science' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information studies' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information technology' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information systems' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information science and technology' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information science and technology studies' field is defined as:

the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported to be the most common serotype of *Shigella* isolated from children with shigellosis [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1970s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [12]. In the 1980s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [13].

In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [14]. In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [15].

In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [16]. In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [17].

In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [18]. In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [19].

In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [20]. In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [21].

In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [22]. In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [23].

In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [24]. In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [25].

In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [26]. In the 2000s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [27].
