the 1990s, the incidence of *S. flexneri* infections has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype of *Shigella* isolated from patients with shigellosis [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1980s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [12]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [13]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [14].

In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [15]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [16]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [17].

In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [18]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [19]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [20].

In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [21]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [22]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [23].

In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [24]. In the 1990s, *S. flexneri* was the most commonly isolated *Shigella* serotype from patients with shigellosis in the United Kingdom [25]. the 1990s, the number of people in the United States who are obese has increased by 100% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1998 (Health Survey for England 2000). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002).

Obesity is a complex condition, with many causes and consequences. It is a leading cause of death and disability in the United States, and a major public health problem in many other countries. Obesity is associated with a number of health problems, including heart disease, diabetes, and certain types of cancer. It is also associated with social and psychological problems, such as discrimination and low self-esteem.

There are many factors that contribute to obesity, including genetics, diet, and physical activity. In the United States, the prevalence of obesity has increased significantly in the past few decades, and this is largely due to changes in diet and physical activity. In the United Kingdom, the prevalence of obesity has also increased, but at a slower rate than in the United States.

Obesity is a complex condition, and it is important to understand the factors that contribute to it. This paper will review the current evidence on the causes and consequences of obesity, and will discuss the implications for public health. We will also discuss the role of the environment in the development of obesity, and the role of the individual in preventing and treating obesity.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the community. The Department of Health (1999) has published a strategy for older people, which sets out a vision for the future of older people's health and social care. The strategy is based on the following principles:

- Older people should be able to live independently and actively in the community.
- Older people should be able to access the services and support they need to live well.
- Older people should be able to participate in decisions about their care and support.
- Older people should be able to live in a safe and secure environment.

The strategy also sets out a number of key objectives for the future, including:

- To reduce the number of older people who are in long-term care.
- To improve the quality of life for older people.
- To ensure that older people have access to the services and support they need to live well.
- To ensure that older people are able to participate in decisions about their care and support.

The strategy is a key document for the development of older people's services in the UK. It provides a clear vision for the future and sets out the principles and objectives that should guide the development of older people's services.

The strategy is based on the following principles:

- Older people should be able to live independently and actively in the community.
- Older people should be able to access the services and support they need to live well.
- Older people should be able to participate in decisions about their care and support.
- Older people should be able to live in a safe and secure environment.

The strategy also sets out a number of key objectives for the future, including:

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the number of people in the world has increased so rapidly. One of the main reasons is that the number of people who are under 15 years of age has increased so rapidly. This is due to a number of factors, including a decline in the death rate, a decline in the birth rate, and a decline in the age at which people are having children.

The decline in the death rate is due to a number of factors, including a decline in the number of people who are dying from infectious diseases, a decline in the number of people who are dying from heart disease, and a decline in the number of people who are dying from cancer. The decline in the birth rate is due to a number of factors, including a decline in the number of people who are having children, a decline in the number of children who are being born, and a decline in the number of children who are surviving.

The decline in the age at which people are having children is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age. This is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age.

The decline in the number of people who are having children at a young age is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age. This is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age.

The decline in the number of children who are being born at a young age is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age. This is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age.

The decline in the number of children who are surviving at a young age is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age. This is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age.

The decline in the number of people who are having children at a young age is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age. This is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age.

The decline in the number of children who are being born at a young age is due to a number of factors, including a decline in the number of people who are having children at a young age, a decline in the number of children who are being born at a young age, and a decline in the number of children who are surviving at a young age.
