the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in decisions about their care.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care in the public sector. The Department of Health (2000) has set out a number of key objectives for the public sector, including: 'to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care'.

The Department of Health (2000) has also set out a number of key objectives for the public sector, including: 'to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care'.

The Department of Health (2000) has also set out a number of key objectives for the public sector, including: 'to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care'.

The Department of Health (2000) has also set out a number of key objectives for the public sector, including: 'to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care, to ensure that the public sector is able to provide a high quality of care'.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 3.9 billion in 1980 to 5.0 billion in 1999.

There are a number of reasons why the world population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. This is due to a number of factors, including improved medical care, increased access to contraception, and a shift in cultural values.

Another reason why the world population is growing so rapidly is that the number of people who are surviving into old age has increased. This is due to a number of factors, including improved medical care, increased access to health care, and a shift in cultural values.

There are a number of challenges that the world population growth poses. One of the main challenges is that it is putting a strain on the world's resources. This is because there are a limited number of resources, such as food, water, and energy, and the growing population is increasing the demand for these resources.

Another challenge that the world population growth poses is that it is increasing the risk of environmental degradation. This is because a larger population is likely to have a larger impact on the environment, such as through increased deforestation, increased pollution, and increased greenhouse gas emissions.

There are a number of ways that the world population growth can be managed. One way is to improve the world's resources. This can be done by increasing the efficiency of resource use, by developing new technologies, and by conserving resources.

Another way that the world population growth can be managed is by reducing the number of people who are surviving into old age. This can be done by improving medical care, by increasing access to health care, and by shifting cultural values.

There are a number of other ways that the world population growth can be managed. These include increasing the number of people who are working, increasing the number of people who are in school, and increasing the number of people who are in the workforce.

The world population growth is a complex issue that requires a number of different approaches to manage it. It is important that we take action now to manage the world population growth, so that we can ensure a sustainable future for all.
