the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) and the number of people in the public sector who are employed in the health sector has increased by 1.2 million (from 1.3 million in 1980 to 2.5 million in 1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care provided by the public sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which sets out the framework for the regulation of health care providers, and the introduction of the Health Care Commission, which is responsible for monitoring and improving the quality of care provided by the public sector.

The Health Care Act 1999 also sets out the framework for the regulation of health care providers. This includes the introduction of the Health Care Commission, which is responsible for monitoring and improving the quality of care provided by the public sector. The Health Care Commission is also responsible for ensuring that health care providers are compliant with the standards set out in the Health Care Act 1999.

The number of people in the public sector who are employed in health care has increased by 1.2 million, from 1.3 million in 1980 to 2.5 million in 1998 (Department of Health 1999).

There is a growing emphasis on the need to improve the quality of health care, and this has led to a number of initiatives to improve the quality of health care. The National Patient Safety Agency (NPSA) was established in 1999 to improve patient safety. The NPSA has a number of initiatives to improve patient safety, including the National Patient Safety Programme (NPSP) and the National Patient Safety Forum (NPSF). The NPSP is a programme of initiatives to improve patient safety, and the NPSF is a forum for the discussion of patient safety issues.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office of National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2010, and the number of people aged 75 and over to 3.5 million (Office of National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been launched in the UK to address this need. The Department of Health has launched the 'Ageing Well' initiative, which aims to improve the lives of older people by providing them with the services and support they need. The Department of Health has also launched the 'Ageing Well' campaign, which aims to raise awareness of the needs of older people and to encourage people to take action to improve their lives.

The 'Ageing Well' initiative is a multi-agency effort involving the Department of Health, the Department of Social Security, the Department of the Environment, and other government departments. The initiative aims to improve the lives of older people by providing them with the services and support they need. The initiative also aims to raise awareness of the needs of older people and to encourage people to take action to improve their lives.

The 'Ageing Well' campaign is a multi-agency effort involving the Department of Health, the Department of Social Security, the Department of the Environment, and other government departments. The campaign aims to raise awareness of the needs of older people and to encourage people to take action to improve their lives.

The 'Ageing Well' initiative and the 'Ageing Well' campaign are part of a larger effort to improve the lives of older people in the UK. The Department of Health, the Department of Social Security, the Department of the Environment, and other government departments are working together to provide older people with the services and support they need.

the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype in children with acute bacterial dysentery [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1970s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [12]. In the 1980s, *S. flexneri* was the second most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [13]. In the 1990s, *S. flexneri* was the most commonly isolated serotype from patients with acute bacterial dysentery in the United Kingdom [14].

The purpose of this study was to determine the epidemiology of *S. flexneri* in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute bacterial dysentery in the United Kingdom, and we determined the serotypes of *S. flexneri* isolated from patients with acute bacterial dysentery in the United Kingdom.

We determined the serotypes of *S. flexneri* isolated from patients with acute bacterial dysentery in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute bacterial dysentery in the United Kingdom.

We determined the serotypes of *S. flexneri* isolated from patients with acute bacterial dysentery in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute bacterial dysentery in the United Kingdom.
