the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1999 (1.2 million in 1980).

There are a number of reasons why the public sector has become an important employer of people with disabilities. One reason is that the public sector has a long history of employing people with disabilities. In the 19th century, the public sector employed people with disabilities in a number of different roles, including as clerks, typists, and stenographers.

Another reason why the public sector has become an important employer of people with disabilities is that the public sector has a number of different departments and agencies, each of which has its own specific needs. This means that the public sector can employ people with disabilities in a wide range of roles, including as clerks, typists, stenographers, and in a number of other roles.

A third reason why the public sector has become an important employer of people with disabilities is that the public sector has a number of different policies and procedures in place to support people with disabilities. These policies and procedures are designed to ensure that people with disabilities are able to work in the public sector on an equal basis with people without disabilities.

There are a number of challenges facing the public sector in its efforts to employ people with disabilities. One challenge is that the public sector has a number of different departments and agencies, each of which has its own specific needs. This means that the public sector can employ people with disabilities in a wide range of roles, including as clerks, typists, stenographers, and in a number of other roles.

A second challenge facing the public sector is that the public sector has a number of different policies and procedures in place to support people with disabilities. These policies and procedures are designed to ensure that people with disabilities are able to work in the public sector on an equal basis with people without disabilities.

A third challenge facing the public sector is that the public sector has a number of different policies and procedures in place to support people with disabilities. These policies and procedures are designed to ensure that people with disabilities are able to work in the public sector on an equal basis with people without disabilities.

A fourth challenge facing the public sector is that the public sector has a number of different policies and procedures in place to support people with disabilities. These policies and procedures are designed to ensure that people with disabilities are able to work in the public sector on an equal basis with people without disabilities.

A fifth challenge facing the public sector is that the public sector has a number of different policies and procedures in place to support people with disabilities. These policies and procedures are designed to ensure that people with disabilities are able to work in the public sector on an equal basis with people without disabilities.

A sixth challenge facing the public sector is that the public sector has a number of different policies and procedures in place to support people with disabilities. These policies and procedures are designed to ensure that people with disabilities are able to work in the public sector on an equal basis with people without disabilities.

A seventh challenge facing the public sector is that the public sector has a number of different policies and procedures in place to support people with disabilities. These policies and procedures are designed to ensure that people with disabilities are able to work in the public sector on an equal basis with people without disabilities.

An eighth challenge facing the public sector is that the public sector has a number of different policies and procedures in place to support people with disabilities. These policies and procedures are designed to ensure that people with disabilities are able to work in the public sector on an equal basis with people without disabilities.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been launched in the UK to address this need. The Department of Health has launched the 'Ageing Well' initiative, which aims to improve the lives of older people by providing them with the services and support they need. The Department of Health has also launched the 'Ageing Well' campaign, which aims to raise awareness of the needs of older people and to encourage people to get involved in helping them.

The 'Ageing Well' initiative is a multi-agency effort, involving the Department of Health, the Department of Social Security, the Department of the Environment, and the Department of Transport. The initiative is aimed at improving the lives of older people in a number of ways, including by providing them with the services and support they need, by raising awareness of the needs of older people, and by encouraging people to get involved in helping them.

The 'Ageing Well' campaign is a multi-media campaign, involving television, radio, and print. The campaign is aimed at raising awareness of the needs of older people and at encouraging people to get involved in helping them. The campaign is also aimed at encouraging older people to get involved in helping others.

The 'Ageing Well' initiative and the 'Ageing Well' campaign are part of a larger effort to improve the lives of older people in the UK. The Department of Health is also working on a number of other initiatives to improve the lives of older people, including by providing them with the services and support they need, by raising awareness of the needs of older people, and by encouraging people to get involved in helping them.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1998, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1998, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are full-time and permanent. In 1998, 68% of the public sector workforce were employed on full-time contracts, compared with 58% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are considered to be essential services, such as health care and education.

Finally, the public sector has become an important employer of women because it has a high proportion of jobs that are well-paid. In 1998, the average salary of a public sector employee was £18,000, compared with £15,000 in 1980. This is due to the fact that the public sector has a high proportion of jobs that are considered to be high status, such as those in the civil service and the judiciary.

The public sector has also become an important employer of women because it has a high proportion of jobs that are flexible. In 1998, 22% of the public sector workforce were employed on part-time contracts, compared with 12% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are considered to be flexible, such as those in the health care and education sectors.

The public sector has also become an important employer of women because it has a high proportion of jobs that are secure. In 1998, 88% of the public sector workforce were employed on permanent contracts, compared with 78% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are considered to be secure, such as those in the civil service and the judiciary.

The public sector has also become an important employer of women because it has a high proportion of jobs that are well-located. In 1998, 68% of the public sector workforce were employed in the London region, compared with 58% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are considered to be well-located, such as those in the health care and education sectors.

The public sector has also become an important employer of women because it has a high proportion of jobs that are well-qualified. In 1998, 88% of the public sector workforce were employed in jobs that required a degree or higher qualification, compared with 78% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are considered to be well-qualified, such as those in the health care and education sectors.

The public sector has also become an important employer of women because it has a high proportion of jobs that are well-paid. In 1998, the average salary of a public sector employee was £18,000, compared with £15,000 in 1980. This is due to the fact that the public sector has a high proportion of jobs that are considered to be well-paid, such as those in the civil service and the judiciary.
