the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. the 1990s, the number of people in the United States who are obese has increased by 50% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1997 (Health Survey for England 1997). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002).

Obesity is a risk factor for a number of chronic diseases, including coronary heart disease, stroke, type 2 diabetes, and certain types of cancer (World Health Organization 1997). In the United States, obesity is the leading risk factor for death and disability (Flegal et al. 2002). In the United Kingdom, obesity is the leading risk factor for death and disability (Health Survey for England 1997). In the United States, obesity is the leading risk factor for death and disability (Flegal et al. 2002).

Obesity is a complex condition that is caused by a combination of genetic, environmental, and behavioral factors. In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1997 (Health Survey for England 1997).

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a new approach to the care of the elderly, one that is based on the principles of 'active ageing'. This approach is based on the idea that older people should be able to live independently, to be active and to participate in society. The Department of Health (1999) has identified a number of key areas for action, including: (1) the need to improve the health of older people; (2) the need to improve the social and economic conditions of older people; and (3) the need to improve the services available to older people.

The Department of Health (1999) has identified a number of key areas for action, including: (1) the need to improve the health of older people; (2) the need to improve the social and economic conditions of older people; and (3) the need to improve the services available to older people. the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 5.5 million to 7.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the community. The Department of Health (1999) has published a strategy for older people, which sets out a vision for the future of older people's health and social care. The strategy is based on the following principles: older people should be able to live independently and actively in the community; older people should be able to access the services they need; and older people should be able to participate in decisions about their care and services.

The strategy also sets out a number of objectives for the future, including: to reduce the number of older people who are dependent on others; to improve the quality of life of older people; to ensure that older people have access to the services they need; and to ensure that older people are able to participate in decisions about their care and services.

The strategy is a key document for the development of older people's services in the UK. It provides a framework for the development of policies and services for older people, and it sets out a number of key objectives for the future.

The strategy is based on the following principles: older people should be able to live independently and actively in the community; older people should be able to access the services they need; and older people should be able to participate in decisions about their care and services.
