the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the world population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. In 1980, the average woman in the world had 2.5 children. In 1999, the average woman in the world had 2.7 children.

Another reason why the world population is growing so rapidly is that the number of people who are surviving to old age has increased. In 1980, the average person in the world lived for 55 years. In 1999, the average person in the world lived for 65 years.

There are a number of reasons why the number of people who are surviving to old age has increased. One of the main reasons is that the number of people who are surviving to old age has increased. [Illegible text block]

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.2 billion.

There are a number of factors which have contributed to this increase in the number of people in the world. One of the main factors is the increase in life expectancy. In 1990, the average life expectancy at birth was 47 years. In 2000, it was 52 years. This increase in life expectancy has led to a larger proportion of the population being aged 65 and over.

Another factor which has contributed to the increase in the number of people in the world is the increase in the number of people who are aged 15–64 years. This increase is due to a number of factors, including the increase in the number of people who are working and the increase in the number of people who are in school.

The increase in the number of people in the world has led to a number of challenges. One of the main challenges is the need for more resources to support the growing population. This includes the need for more food, water, and shelter. Another challenge is the need for more education and training for the growing workforce.

There are a number of ways in which we can address these challenges. One way is to increase the production of food, water, and shelter. Another way is to increase the number of people who are working and the number of people who are in school. A third way is to increase the number of people who are aged 65 and over.

The increase in the number of people in the world is a complex issue. It is one that requires a number of different approaches to address. We need to work together to find solutions that will support the growing population and ensure a better future for all.

The increase in the number of people in the world is a complex issue. It is one that requires a number of different approaches to address. We need to work together to find solutions that will support the growing population and ensure a better future for all.

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of lines of text. Due to the low resolution and potential noise in the scan, the specific words and punctuation are difficult to discern accurately. The text is oriented vertically on the page.]

the 1990s, the incidence of *S. flexneri* infections has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype of *Shigella* isolated from children with shigellosis [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1980s, *S. flexneri* was the most common serotype of *Shigella* isolated from patients with shigellosis in the United Kingdom [12]. In the 1990s, *S. flexneri* was the most common serotype of *Shigella* isolated from patients with shigellosis in the United Kingdom [13].

The aim of this study was to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom.

Methods

The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom. The study was designed to determine the prevalence of *S. flexneri* in the United Kingdom.
