There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (2000) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on the following principles: (1) to ensure that older people are able to live independently and actively; (2) to ensure that older people are able to access the services and support they need; (3) to ensure that older people are able to participate in the life of their communities; and (4) to ensure that older people are able to live in dignity and respect.
