the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase by 2.5 million by 2020 (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' for the care of the elderly. This paradigm is based on the principle of 'active ageing', which is the process of maintaining and enhancing the functional ability of older people to live independently and to participate in society. The Department of Health (1999) has identified a number of key areas for action in order to achieve this paradigm, including: (1) the development of a 'new paradigm' for the care of the elderly; (2) the development of a 'new paradigm' for the care of the elderly; (3) the development of a 'new paradigm' for the care of the elderly.

The Department of Health (1999) has identified a number of key areas for action in order to achieve this paradigm, including: (1) the development of a 'new paradigm' for the care of the elderly; (2) the development of a 'new paradigm' for the care of the elderly; (3) the development of a 'new paradigm' for the care of the elderly. the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of children under 15 years of age in the world is projected to increase to 3.1 billion by 2015, with the largest increases occurring in the developing world (United Nations 1999).

There is a growing awareness of the need to address the needs of children in the world, and the United Nations has developed a series of goals for the year 2015, known as the Millennium Development Goals (MDGs). The MDGs are a set of eight goals that are intended to be achieved by the year 2015, and they are designed to address the most pressing development issues of the world.

The first goal of the MDGs is to eradicate extreme poverty and hunger. This goal is intended to be achieved by halving the number of people in the world who are living on less than \$1 a day by the year 2015. The second goal is to achieve universal primary education. This goal is intended to be achieved by ensuring that all children in the world have access to a primary education by the year 2015.

The third goal of the MDGs is to promote gender equality and empower women. This goal is intended to be achieved by ensuring that women and girls have the same rights and opportunities as men and boys by the year 2015. The fourth goal is to reduce child mortality. This goal is intended to be achieved by halving the number of children under the age of five who die each year by the year 2015.

The fifth goal of the MDGs is to improve maternal health. This goal is intended to be achieved by halving the number of women who die during childbirth by the year 2015. The sixth goal is to combat HIV/AIDS, malaria, and other diseases. This goal is intended to be achieved by halving the number of people who are infected with HIV/AIDS by the year 2015.

The seventh goal of the MDGs is to develop a sustainable environment. This goal is intended to be achieved by ensuring that the environment is protected and that natural resources are used sustainably by the year 2015. The eighth goal is to develop a global partnership for development. This goal is intended to be achieved by ensuring that all countries work together to achieve the MDGs by the year 2015.

The MDGs are a set of goals that are intended to be achieved by the year 2015, and they are designed to address the most pressing development issues of the world. The MDGs are a set of goals that are intended to be achieved by the year 2015, and they are designed to address the most pressing development issues of the world.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 7.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to address the health care needs of the ageing population. The Department of Health (1999) has identified the need to develop a new approach to health care for the ageing population, and has set out a number of key principles for the development of a new approach. These principles are: (1) to ensure that the health care system is able to meet the needs of the ageing population; (2) to ensure that the health care system is able to provide a high quality of care; (3) to ensure that the health care system is able to provide a range of services; and (4) to ensure that the health care system is able to provide a cost-effective service.

The Department of Health (1999) has also identified a number of key areas for the development of a new approach to health care for the ageing population. These areas are: (1) the development of a new approach to the delivery of health care; (2) the development of a new approach to the financing of health care; (3) the development of a new approach to the regulation of health care; and (4) the development of a new approach to the monitoring and evaluation of health care.

The Department of Health (1999) has also identified a number of key challenges for the development of a new approach to health care for the ageing population. These challenges are: (1) the need to ensure that the health care system is able to meet the needs of the ageing population; (2) the need to ensure that the health care system is able to provide a high quality of care; (3) the need to ensure that the health care system is able to provide a range of services; and (4) the need to ensure that the health care system is able to provide a cost-effective service.

The Department of Health (1999) has also identified a number of key opportunities for the development of a new approach to health care for the ageing population. These opportunities are: (1) the need to ensure that the health care system is able to meet the needs of the ageing population; (2) the need to ensure that the health care system is able to provide a high quality of care; (3) the need to ensure that the health care system is able to provide a range of services; and (4) the need to ensure that the health care system is able to provide a cost-effective service.

The Department of Health (1999) has also identified a number of key challenges for the development of a new approach to health care for the ageing population. These challenges are: (1) the need to ensure that the health care system is able to meet the needs of the ageing population; (2) the need to ensure that the health care system is able to provide a high quality of care; (3) the need to ensure that the health care system is able to provide a range of services; and (4) the need to ensure that the health care system is able to provide a cost-effective service.

The Department of Health (1999) has also identified a number of key opportunities for the development of a new approach to health care for the ageing population.
