the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.0 billion.

There are a number of factors which have contributed to the increase in the number of people in the world who are under 15 years of age. These include a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

The decline in the death rate has been the most significant factor. This has been due to a number of factors, including improvements in medical care, a decline in the incidence of infectious diseases, and a decline in the incidence of accidents and violence.

The decline in the birth rate has also been a significant factor. This has been due to a number of factors, including a decline in the number of children born to each woman, a decline in the age at which women first become pregnant, and a decline in the number of women who are married.

The decline in the rate of migration has also been a significant factor. This has been due to a number of factors, including a decline in the number of people who are moving from one country to another, a decline in the number of people who are moving from one region to another, and a decline in the number of people who are moving from one social class to another.

The increase in the number of people in the world who are aged 65 and over has also been a significant factor. This has been due to a number of factors, including a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

The increase in the number of people in the world who are aged 15–64 years has also been a significant factor. This has been due to a number of factors, including a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

The increase in the number of people in the world who are under 15 years of age has also been a significant factor. This has been due to a number of factors, including a decline in the death rate, a decline in the birth rate, and a decline in the rate of migration.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1999, compared with 4.5 million in 1980. The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people from the lower socio-economic groups, with 1.5 million people from the lower socio-economic groups employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people with long-term health conditions, with 1.5 million people with long-term health conditions employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people with mental health problems, with 1.5 million people with mental health problems employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people with physical disabilities, with 1.5 million people with physical disabilities employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people with learning disabilities, with 1.5 million people with learning disabilities employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people with sensory disabilities, with 1.5 million people with sensory disabilities employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people with chronic conditions, with 1.5 million people with chronic conditions employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people with mental health problems, with 1.5 million people with mental health problems employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people with physical disabilities, with 1.5 million people with physical disabilities employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people with learning disabilities, with 1.5 million people with learning disabilities employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people with sensory disabilities, with 1.5 million people with sensory disabilities employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people with chronic conditions, with 1.5 million people with chronic conditions employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people with mental health problems, with 1.5 million people with mental health problems employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people with physical disabilities, with 1.5 million people with physical disabilities employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people with learning disabilities, with 1.5 million people with learning disabilities employed in the public sector in 1999, compared with 1 million in 1980.

The public sector has also become an important employer of people with sensory disabilities, with 1.5 million people with sensory disabilities employed in the public sector in 1999, compared with 1 million in 1980. The public sector has also become an important employer of people with chronic conditions, with 1.5 million people with chronic conditions employed in the public sector in 1999, compared with 1 million in 1980.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

...the study of the processes of communication production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information science' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information studies' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information technology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information systems' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information management' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information policy' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information law' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information ethics' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)
