the 1990s, the number of people in the United States with a college degree has increased from 15% to 25% (U.S. Department of Education, 1999). The increase in the number of people with a college degree has been accompanied by a decrease in the number of people with a high school diploma, from 85% to 75% (U.S. Department of Education, 1999).

There is a growing concern that the increase in the number of people with a college degree is not keeping pace with the needs of the economy. The U.S. Department of Education (1999) reports that the number of people with a college degree is not keeping pace with the needs of the economy. The number of people with a college degree is not keeping pace with the needs of the economy. The number of people with a college degree is not keeping pace with the needs of the economy.
