the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported to be the most common serotype of *S. flexneri* isolated from children with acute colitis [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1980s, *S. flexneri* was the most commonly isolated serotype of *S. flexneri* from patients with acute colitis in the United Kingdom [12]. In the 1990s, *S. flexneri* was the most commonly isolated serotype of *S. flexneri* from patients with acute colitis in the United Kingdom [13].

The aim of this study was to determine the epidemiology of *S. flexneri* in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom, and we determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom.

We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom.

We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom.

We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom.

We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom.

We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute colitis in the United Kingdom.

[The following text is a dense, continuous block of text, likely a scan of a document page. It contains numerous small, illegible characters and symbols, suggesting a very low-quality scan or a document with extremely small text. The text is arranged in a single column, filling most of the page area.]

[The following text is a dense, continuous block of characters and symbols, likely representing a corrupted or heavily redacted document. It contains no legible words or phrases.]

[The following text is a dense, continuous block of text, likely a scan of a document page. It is mostly illegible due to extreme blurring and low contrast. The text appears to be a single paragraph or a series of closely related sentences, but the specific words and structure cannot be discerned.]

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'communication' field is defined as:

...the study of the nature, sources, uses, and management of communication, and the study of the communication of information. (p. 1)

The 'information science' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information studies' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information technology' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information systems' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information management' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information policy' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information law' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

The 'information ethics' field is defined as:

...the study of the nature, sources, uses, and management of information, and the study of the communication of information. (p. 1)

[The following text is a dense, continuous block of text, likely a scan of a document page. It appears to be a mix of English and possibly some non-English characters, but the overall structure suggests a single paragraph or a series of closely related sentences. The text is too blurry and low-contrast to transcribe accurately, but it seems to contain several lines of prose.]

[Illegible text block]

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector and to ensure that the public sector is able to deliver the best possible value for money. This has led to a number of initiatives, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organised and managed, and to a number of changes in the way that the public sector is funded.

One of the key challenges facing the public sector is the need to improve the efficiency of the public sector and to ensure that the public sector is able to deliver the best possible value for money. This has led to a number of initiatives, including the introduction of the Health Service Act 1999, the Health Service Act 2001, and the Health Service Act 2004. These initiatives have led to a number of changes in the way that the public sector is organised and managed, and to a number of changes in the way that the public sector is funded.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999), and the number of people in the public sector who are employed in health care has increased by 1.2 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care provided by the public sector, and to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives, including the introduction of the National Health Service (NHS) Act 2004, which sets out the framework for the NHS, and the introduction of the NHS Commissioning Board, which is responsible for commissioning health services.

The NHS Commissioning Board is responsible for commissioning health services, and for ensuring that the NHS is able to meet the needs of the population. The NHS Commissioning Board is also responsible for ensuring that the NHS is able to provide high quality care, and that the NHS is able to meet the needs of the population.

The NHS Commissioning Board is also responsible for ensuring that the NHS is able to provide high quality care, and that the NHS is able to meet the needs of the population. the 1990s, the number of people in the United States who are obese has increased by 50% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 15% in 1997 (Health Survey for England 1997). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002).

Obesity is a complex condition, and its aetiology is multifactorial. It is the result of an imbalance between energy intake and energy expenditure. The energy intake is determined by the amount of food and drink consumed, and the energy expenditure is determined by the amount of physical activity. The imbalance between energy intake and energy expenditure is the result of a combination of genetic, environmental, and behavioural factors.

Obesity is a major public health problem, and it is associated with a number of health problems, including type 2 diabetes, heart disease, and stroke. It is also associated with a number of psychological problems, including depression and anxiety. Obesity is a complex condition, and its aetiology is multifactorial. It is the result of an imbalance between energy intake and energy expenditure.

The energy intake is determined by the amount of food and drink consumed, and the energy expenditure is determined by the amount of physical activity. The imbalance between energy intake and energy expenditure is the result of a combination of genetic, environmental, and behavioural factors. Obesity is a complex condition, and its aetiology is multifactorial.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1999, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1999, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are full-time and permanent. In 1999, 68% of the public sector workforce were employed on full-time contracts, compared with 58% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are essential to the functioning of the state, such as those in the health and education sectors.

Finally, the public sector has become an important employer of women because it has a high proportion of jobs that are well-paid. In 1999, the average salary for a woman in the public sector was £21,000, compared with £18,000 in 1980. This is due to the fact that the public sector has a high proportion of jobs that are in the higher grades of the public sector pay scale, such as those in the senior management and professional grades.
